

# The Crusade Quick Reference Card

## Character Menu Keys & Functions

B BEGIN PLAY  
N NEW LEVEL  
E EXIT GAME  
X SOUND EFFECTS  
If you hit new level  
and you don't want  
a new level, just hit  
return.

CHAR	+	-
QUEEN	Q	W
KNIGHT	K	J
SERF	S	D
ARCHER	A	Z
MIRROR	M	SPC
LASER	L	;

## Hints and Special Keys

T or TAB causes your player to move as far as possible in the direction it is facing. This works for all characters but the laser and the mirror. You will 'turbo' into pits, traps, and items that your character can pickup, so be very careful using this option. If the King dies, the turbo dies with him!

RETURN unselects a character.

ESC centers the screen around the current character, if one is selected.

Invisible walls are found on some of the levels!

## Game Screen Keys & Functions

R Rotate a character if one is selected.  
A Cause a character to attack if it can.  
Queen must have one or more bombs.  
Knight will attack the direction he is facing.  
Archer must have one or more arrows.  
Laser will fire the direction it is facing.

D Detect a trap. You must select with the mouse, the location after pressing D.

B Build a bridge. Only for Serfs. You must be facing water, and have a hammer.

P Pause or unpause the game.

Arrow keys will move the character or screen in the direction of the arrow pressed if it is possible.

< or > Jump to the previous or next character.

S Shows how many of each character remains.

E Exit the game screen. This will reset the level!

## Hard Drive Installation:

### From WorkBench:

Place The Crusade disk 1 in any drive.

Double click on the Disk's icon, then double click on the InstallCrusade icon.

Enter the path you want, or use the default, and then select GO.

Follow the instructions given from there on.

After The Crusade is installed, you can play it from WorkBench by clicking on The Crusade's Icon.

### From CLI:

Place The Crusade disk 1 in Df0:

CD to Df0:

Type

Install\_Crusade [return]

Enter the path you want, or use the default.

Follow the instructions given from there on.

After The Crusade is installed, you can play it from CLI by CDing to TheCrusade's directory and typing:

TheCrusade [return]
