The Zyroneans were an advanced, pacifistic civilisation, until the arrival of Kayleth and his obsessional craving for Chromazin, a rare mineral found in small quantities on the planet Zyron.

Now, Kayleth rules the Zyron skies with awesome power, using an Atomic Bismember system to send down his powerful army of androids to enslave the Zyroneans and force them to claw-out the subterranean rocks to extract the precious ore.

What is Kayleth? Why are particular Zyroneans transported to the orbiting nerve centre of his domain, never to return?

How can this tyrant be eliminated? Have you got the iron nerve and cunning required to defeat him before he completes the total destruction of your home planet?

You, a loyal Zyronean, have avoided capture long enough to set into motion a plan to liberate your beloved planet. However, as you are about to discover, certain events have overtaken your well laid schemes!!!
