OWNERS

The New Print Shop®

Heightened Creativity

Since 1984, The Print Shop has been one of the best-loved software programs of all time. Over one million people have purchased it. And it's easy to see why.

The Print Shop with its Companion and Graphics Libraries, lets you make fun, personalized greeting cards, signs, calendars (daily, weekly, monthly and yearly), posters, banners, letterheads — whatever your mind can imagine on the printed page.

And it's easy to use. You don't have to be an artist or a computer whiz. Simple menus guide you all the way. You choose from nearly 100 professionally-created graphic elements, including borders, graphics and fonts.

The best just got better.

But good as it was, it just got even better. Because with The New Print Shop you can do even more. More quickly. More easily. With an improved design interface that lets you change your mind as often as the creative urge strikes.

We've pushed the outer limits of your computer's graphic abilities to give your creations a more polished look.

And now you can place multiple multicolor graphics and fonts anywhere on the page. You can even treat text like art: shrink, resize or center your message.

TEACHERS:
Call for information
on school versions.

You ain't seen nothing yet!

The "what you see is what you get" preview feature lets your imagination run wild as you design. You can even use a different font for each line. A name file lets you send the same card to as many friends as you want — with their own names merged in.

You can also create birthday cards with side-fold or top-fold, monster-sized posters over 9' tall and 6½' wide, or tiny place cards and gift tags.

Join the millions who've already found so much fun. All you need is a little creativity, something to say and The New Print Shop.

The New Print Shop Graphics Library® Sampler Edition

Celebrate over 100 new ways to be creative!

No matter how important your message is, you always need new ways to say it if you want to keep your reader's attention. That's why you'll want the Sampler Edition. In the over 100 graphics, borders and fonts you'll find just the right extra something that brings your point home. It's a little bit of everything. Butterflies, bicycles and burgers. Candlesticks, cockatiels and carousels. Pie a la mode and pink flamingos!

Here are exciting graphics and design elements professionally created to add a little zip to your next poster, memo, or flyer. Designed to take advantage of your computer's highest capabilities, the graphics in the Sampler Edition add a whole new level of artistic quality to your creations. You'll also get new fonts, borders and full panel designs. Covers holidays, birthdays, school, sports and more. Requires The New Print Shop.

The New Print Shop Graphics Library School & Business Edition

More than 100 graphics to spruce up your communication.

Having trouble making your notices jump out from cluttered bulletin boards? It doesn't matter what you've got to say if no one reads it! The School & Business Edition gives you more than 100 graphic solutions — an absolute boon to students, teachers and business people! Here are lively graphic symbols that will perk up the most humdrum notice, form, inter-office memo. Students and teachers choose from chalkboards, chemical beakers, fall leaves, school buses, cheerleaders — dozens more. For business you'll want the floppy disks, "no smoking" signs, calculators, currency and many, many more graphics you'll use every day. Requires The New Print Shop.

"I sell Discovery Toys, and I use The Print Shop to make colorful flyers to announce my home selling parties...on our Apple IIgs, the color is wonderful! It's so much better than a boring postcard. My husband is a teacher, and he uses it to make banners for school. Reed, our 7-year old, makes greeting cards — actually, that's something we all use it for. Believe it or not, even our 2-year old, Jill, is learning to use it!"

— PEGGY STARKEY,
Toy Distributor, Marrysville, MI

SOLD TO:

Scalable fonts for top quality printouts.

The Print Shop FormBuilder™

Now producing professional-quality forms is Print Shop easy.

The Print Shop FormBuilder comes complete with ready-made forms you can print out instantly, customizing or personalizing them as little or as much as you want. Or you can use its special form-building tools to create your own professional-looking forms.

Unlike other form programs, FormBuilder gives you more than just simple lines and boxes. FormBuilder comes with a selection of fonts and graphic symbols, including five scalable fonts from URW, that can add flair and polish to your invoices, P.O.s, message slips, time sheets, expense reports and many other forms. And FormBuilder prints out at the highest possible resolution for your hardware. It even prints in color. (Includes Nimbus Q font rendering software.) Perfect for businesses, schools or other organizations that want great looking forms without the frustration. FormBuilder is the only forms designer that is as easy to use as The Print Shop.

Dazzle Draw™

Create dazzling artwork in 16 colors and unlimited patterns.

Drawing and painting is easy with Dazzle Draw. No other double-high-resolution paint program offers as many features, options and special tools.

Start by choosing from a wide range of brush widths and shapes to paint bold or delicate lines. Then, using a palette of 16 brilliant colors (that can be mixed to create even more), you can "flood fill" or "spray paint" any part of your drawing with a dazzling variety of textures and patterns. Go ahead and cut, paste and edit your work — it's easy to do.

Beginners will find themselves turning into instant artists. Professional designers will be able to produce sophisticated, high-quality graphics, prints and slides. Double-high resolution provides extraordinary color and detail on your Apple IIc or 128K IIe. Use Dazzle Draw with your mouse, joystick, KoalaPad™ or Apple Graphics Tablet™.

Fantavision™

TEACHERS:
Call for information
on school versions.

This "magic motion" program does the hard work for you.

This amazing program makes it possible for beginners as well as graphics wizards to create colorful cartoons, dazzling special effects and complete motion pictures.

Fantavision can bring animation to any colorful drawing. Once you've created any two objects or creatures in separate frames, Fantavision will generate up to 64 (128 on the Amiga) "in-between" frames to make your first drawing turn smoothly into your second. This animation technique — called "tweening" — replaces the frame-by-frame process that professional animators normally use.

You can even direct your own movies and send them to friends (they don't need Fantavision to run them). Best of all, you have fun, while Fantavision does most of the work.

Now, Fantavision has been greatly enhanced for the IBM PC, Apple IIGS and Amiga.

"I use Fantavision as an attention grabber for trade show booths. This program really catches the eye with motion and beautiful graphics. It's wonderful!"

The Electronic Whole Earth Catalog

We put the Whole Earth on a CD-ROM!

Now Macintosh owners can experience one of the first consumer applications of CD-ROM® technology! The Electronic Whole Earth Catalog from Brøderbund is bigger than the printed version — over 2,500 entries. It's an astoundingly diverse assortment of unbiased recommendations on books, magazines, tools and mail order catalogs. Some call it "the sourcebook for modern times." Included is new material on communications, technology and computing. But since it's all published on a CD-ROM, you get features that aren't possible in a printed-and-bound catalog.

Like sound! Instead of just reading about a record or tape, you can actually listen to selections from 400 recordings, including excerpts from narrated books-on-tape. Even listen to birdcalls! Also included are full-screen digitized images and over 2,000 graphics.

And since it runs under HyperCard® which is included, you can move from one subject to another very quickly — it's as easy as associating one idea with another. So start your tour of The Whole Earth today, and be among the first to benefit from innovative CD-ROM technology.

DTP Advisor™

The ultimate training and scheduling tool for desktop publishers.

You're set up for desktop publishing. Now where do you begin? Designed by a graphic arts professional, DTP Advisor is a HyperCard application that shows you how to get professional desktop publishing results fast.

DTP Advisor is actually two programs in one. First, it's a graphic arts tutor you can consult about specific design decisions. It gives you highly interactive advice, defines graphic art and print production terms, and includes animated sequences to show you what works and what doesn't in any given layout. And why.

You can click a button to examine different typeface samples. Or with another click, see a dynamic illustration that clarifies publishing terms like "leading" and "kerning."

The second half of DTP Advisor is a great project management system. A database and simple interactive forms let you set up individual files for all your publishing projects. So you can keep track of schedules, estimates, target audiences and outside resource lists.

DTP Advisor is an indispensable organizational tool for individuals, small businesses and departments involved in desktop publishing. If you deal with graphic artists and printers, it can help you speak their language. And if you design page layouts yourself, it can make your output look much more professional.

To really make your investment in desktop publishing pay off, you need DTP Advisor. You'll be better equipped, better informed and better organized.

"When I decided to get out of teaching, I went to business school and wound up selling computers. But now I've got my own business called DocuTech. I create manuals and newsletters for various companies . . . DTP Advisor is great for people like me who don't have a design background. It's like having an on-line tutorial you can use with any desktop publishing program."

— JANE FARRELL,
Desktop Publisher,
Palo Alto, CA

TypeStyler™

Put your best font forward.

Now you can turn ordinary display type into creative, attention-getting typography with TypeStyler.

You can bend, twist, distort, arch, stretch, flip and rotate text—creating unique special effects for logos, headlines, mastheads and more. TypeStyler also features automatic or manual kerning and leading. Plus custom backdrops at the click of a mouse. There's variable letter and word spacing too. A simple step-by-step tutorial explains everything.

Included are ten popular AGFA Compugraphic® typefaces. TypeStyler also works with hundreds of commercially available fonts — or you can create your own using Altsys' Fontographer. EPSF and PICT import/export capability ensures compatibility with other DTP products like Aldus PageMaker® and Adobe Illustrator®. Works with either QuickDraw or PostScript printers. On-screen color and full-page displays are supported, and it's Multi-Finder® compatible.

Add ten more typefaces with the SmoothFont Sampler.

These were selected from five of America's best known typeface manufacturers and are already converted into TypeStyler Smoothfonts:

Altsys' Goudy New Style Bold and **Cooper Bold**, Bitstream's **Charter** and **Provence**, The Font Company's **Brush** and **Antiqua Extra Bold**, Mactography's **Hammond** and **Moonlight Extra Bold**, and Dubl-Click's **Hoboken** and **Aukland**.

Turn your type into dazzling professional typography.

Drawing Table®

At last. A serious drawing tool at an easy-to-swallow price.

Drawing Table is the most accessible professional-quality drawing tool available for the Macintosh. For illustrations, maps, diagrams, charts, flyers, posters — whatever your graphic needs. Drawing Table is filled with shortcuts that give power to the experienced artist, and immediate results to the new one.

- A text-binding feature automatically fits text to lines and curves on-screen and prints the text to an ImageWriter®, ImageWriter LQ, or LaserWriter®.
- Powerful tools provide precise scaling and rotation of objects.
- Object alignment is automatically controlled.
- Drawing Table adds color to your drawings even if you're using a black-and-white screen — you can print in color on an ImageWriter II and LQ.

Drawing Table also gives you access to the world of PostScript® art, as well as PICT and PAINT graphics. You can mix graphics from these environments with Drawing Table's extensive libraries (over 15 in all) where you'll find building blocks for maps, landscaping, interiors, letterheads and more.

Import or export graphics without cutting and pasting!

Open up to eight windows at once — and simply drag clip art directly from a library window to a drawing. You can zoom in for close-ups and zoom out for multipage illustrations. For professional results at an affordable price, Drawing Table is the Macintosh tool everyone can draw on.

Import graphics to add to your drawings.

Bind text to curves and preview it on-screen.

MemoryMate®

Imagine tossing all your notes into a huge desk drawer. Then magically discovering that everytime you want something, it's right on top!

MemoryMate is a new breed of data manager that reduces your paper clutter and takes the mess off your desk. Enter all your random thoughts and notes into MemoryMate (up to 120 lines for each entry) and every single word, phrase and number is automatically indexed. And cross-indexed. MemoryMate can find that entry fast — by using any word, date or phrase in it. You can search 100K on a PC-XT in one second! MemoryMate also lets you forget all your deadlines and to-do lists. Because it reminds you with an on-screen tickler message that pops up automatically on days you select.

Since MemoryMate is memory-resident, it's always there, ready to be accessed at the touch of a key.

So is a better memory worth \$69.95? Much more, according to *PC Week*: "(MemoryMate) is already worth far more to a professional who works with unstructured data than any \$700 database management package."

"I used to have piles of paper all over my desk, but now that I have MemoryMate, I keep all my notes organized in my computer! I also write to-do lists and priority lists for personal and business use. The organization capabilities of MemoryMate are endless."

— DAVID FEEN,
Attorney,
New York, NY

On Balance™

Ever wonder where the money goes each month? On Balance is the easiest way to manage your finances and start a budget.

If you have trouble balancing your checkbook — not to mention your budget — life just got a little easier.

On Balance is the easiest money management program that's ever been devised for the personal computer. There's virtually no setup time. You create accounts instantly. Then, in about the time it usually takes to write and record a check, On Balance can do much more.

More than just a checkbook balancer.

On Balance records and reconciles bank and credit card transactions, creates and tracks budgets, prints custom reports — even prints checks. Recurring transactions are entered just once — On Balance warns you when they are due and will update your records automatically. It prints reports that show everything from your total net worth to what you've spent on doctor bills this year. Even helps make tax season more of a holiday by flagging tax items and printing a full report in plenty of time for April 15th. If you ever find yourself wondering where the money goes each month, On Balance is the answer. It's a fast, easy, accurate way to keep track of your money and plan for the future.

"I was impressed that you can enter accounts as you're going (instead of setting them up first) and if you're not sure what type of account it is (liability or asset) you can change your mind later! It makes managing money so easy!"

— MIKEL COOK,
Computer Consultant,
Sebastopol, CA

Type!™

Your personal typing tutor.

Type! is an intelligent typing program that utilizes scientific research on how people really learn to type. It uses exercises that are lively and entertaining. And it shows you, with graphs, how you're improving by letter, by keyboard row, by hand, even by finger. You'll get constant feedback and suggestions about which exercises to try next. Whether you're a novice or just want to improve your skills, Type! is the only typing course you'll ever need.

Bank Street Writer Plus™

A greatly enhanced version of our best-selling word processor.

The first genuinely easy-to-use word processor, Bank Street Writer Plus contains every easy-to-use feature of the original version. But lets you do much more. Now you can create single-key "short-cut" commands so you can skip over certain menus and prompts. This feature also allows you to set up function keys to make your own multi-step commands (macros). There's also a 60,000-word automatic Spell Checker and an on-line Thesaurus.

Note: The Apple II version is written under ProDOS — so it works with the new 3.5" disk drives and hard disks.

The original Bank Street Writer® for Commodore & Atari users.

The original Bank Street Writer features on-screen prompts and commands for just about every function, and an on-disk tutorial for a quick and easy way to learn the program.

Science Toolkit™

TEACHERS:
Call for information
on school versions.

Master Module

Why do you perspire on a hot summer's day?

What do an elephant's ear and a radiator have in common? What happens to starlight as it travels toward earth? The Science Toolkit answers fun puzzles like these as you journey into the exciting world of science. It actually turns your computer into a sensitive scientific instrument. Included are external light and temperature probes that let you perform real-world experiments — not simulations. There's an on-screen timer, thermometer, light meter, and strip chart recorder to help you measure events that are too fast or too slight for human perception. Data tables can be printed to show values and time intervals so you can analyze and compare data to form scientific theories and conclusions. Comes with an illustrated manual and experiment guide with dozens of step-by-step experiments and suggestions for many more to perform on your own. Who knows, you may be the next Einstein!

Master Module

by L. Elliott and S. Shumway

HARDWARE	ITEM#	PRICE
Apple (64K) II+, IIe, IIc, IIgs	40550	\$79.95

Module 1: Speed and Motion

How is a fish like a sports car? How much baggage can an astronaut take into space? Questions like these are answered in Science Toolkit Module 1. A balloon-powered car and an additional light probe are included. You'll discover the laws of nature through experimentation — just as professional scientists do. You'll actually see events that are too fast or too slight for the naked eye. Also included are a photocell, user's manual, experiment guide, and lab notebook labels. Master Module required.

Module 2: Earthquake Lab

Did an earthquake change the course of the Mississippi? Why do San Francisco skyscrapers sway in the wind? With Earthquake Lab, you'll find the answers to these fascinating questions. Set up experiments to measure who has the heaviest footsteps. Measure how much passing trucks and buses shake your house. The seismograph included in the package is highly sensitive, and an experiment plotter records your results. Get ready to shake, rattle and roll as you learn some serious science. Master Module required.

"We have two children, 11 and 13 years old, and my husband and I are committed to teaching them at home. We use the computer a lot, and they love Science Toolkit. I use it for teaching them physics. It's easy for them to use...they like to experiment and try new things out. It's really quite accurate...their favorite experiments are the ones with the little car and the balloon. They both love having school at home. And we know they're getting the learning and attention they deserve."

— JUDY VANMETER,
Home Educator, Brighton, CO

Geometry™

Bring to life the abstractions of geometry.

Geometry lets you explore the basic concepts of the subject in ways never before possible. Interactive animation vividly illuminates abstract ideas. For example, you can actually create and move angles to test the theorem that the sum of the angles in a triangle is 180 degrees. Help is always available in the form of hints, references, explanations or answers to problems. Over 350 problems are included. Classroom-tested and compatible with all major textbooks. Geometry follows the classic curriculum and proves hundreds of theorems "hands-on." Winner of The Award of Excellence (*Classroom Computer Learning*) and the Critics' Choice Award for Best Educational Software (*Family Computing*).

"If I had to settle for only one education program, it would be Brøderbund's **Science Toolkit**... This is the way to turn (your computer) into a small scientific lab."

—Bob Schwabach,
"On Computers," December 1988

"Walt Disney's artists had to draw millions of pictures to produce full-length animated movies. But you don't. Animation programs, packages that give you the tools to create your own computer "toons," are the hot new kids on the software block. Brøderbund's **Fantavision** easily qualifies as the best such program for the IBM PC and compatibles."

—*Compute!* magazine,
February, 1989

"**The Electronic Whole Earth Catalog** is an excellent implementation of a multimedia information product using the best of existing technology... there's lots of interesting stuff to look at... read... and listen to... (the) interface design is the best... on a HyperCard-based product of any kind."

—*PC Letter*
March, 1989

"**Geometry** serves a useful function — and it's a lot more fun than a standard workbook. Whether you need to pass a test, teach a class, or just do a few mental pushups with the right hemisphere of your brain. Geometry's an enjoyable way to do it."

—*inCider* magazine
July 1989

Calculus™

Explore the basic concepts of calculus.

Calculus presents a full year of introductory calculus covering the AB Advanced Placement exam. This program lets you create and graph functions and their derivatives. Its animated demonstration feature shows you how to solve complex problems step by step. Since the program moves at your own pace, it's useful for review, tutoring, and for users who wish to accelerate their learning. Over 350 problems included, with an Automated Index and Table of Contents.

Physics™

Experiment with the laws of classical mechanics.

Make the excitement of physics unfold before your eyes. A science of energy and matter comes vividly to life on-screen as you manipulate vectors, interpret graphs and solve problems. You can experiment with velocity and position to see changes in orbital motion and work with dynamic kinetic and potential energy simulations. Like all Sensei programs, Physics makes full use of the interactive capabilities of the computer, with animation, immediate feedback, hints or further explanation. Physics is a complete introductory course in classical mechanics that reviews, amplifies and complements an entire year's coursework. It takes you through more than 300 problems at your own pace, giving individualized support and guidance.

Where in Time is Carmen Sandiego?™

Now Carmen and her gang of villains are making history.

In her newest adventure, Carmen Sandiego is committing crimes all across history. She and her all-new gang can be anywhere in the last 1500 years. The Acme Detective Agency wants you to find her fast, and you don't have much time! With your trusty Chronoskimmer 325i, you'll hurtle back through the ages. Through the Renaissance, the Industrial Revolution, the Incan Empire, Imperial Japan and much more. The more cases you crack, the tougher they get. Along the way, you'll meet and talk with famous historical figures. A copy of the 1300-page *New American Library Desk Encyclopedia* is included to help you with clues. The VGA graphics are exceptional, and the sheer depth and breadth of Carmen's newest adventure will amaze you. You'll have the time of your life, time after time, as you chase Carmen across the centuries.

Where in Europe is Carmen Sandiego?™

Carmen strikes again! This time in Europe.

There won't be a stone left at Stonehenge! Or a gondola left in Venice! In this adventure, Carmen is going after the treasures of Europe. It's your job to stop her. You'll travel through all 34 European nations. And you'll encounter colorful sights and sounds in each of them, including animation that brings Europe to life. An on-screen graphic travel map keeps you oriented at all times, and makes it easy to plot your course across the Continent. As you follow Carmen, you'll learn lots about European geography, culture and history. A new on-line Database provides additional facts on European nations. And a computerized Crimestopper's Notebook keeps track of clues to the culprit's identity. Use it to record the goods on each culprit to help make sure you get the right arrest warrant. Includes Rand McNally's *Concise Atlas of Europe*, detective guide and user's manual. For sleuths of all ages.

Where in the World is Carmen Sandiego?

Chase Carmen around the world!

Carmen Sandiego is so entertaining and fun that most people don't even think of it as educational! But Carmen actually sharpens your thinking skills and helps you learn about the world. Kids love it because it's fast and fun to play. Adults find it enjoyable and challenging as well. And this particular Carmen edition is the platinum-selling hit that started it all, and winner of several major industry awards.

In this adventure, the mysterious ex-secret agent was seen heading for Istanbul — or was it Cairo? You'll chase Carmen and her gang of master thieves all over the globe as you decipher clues using your Crime Computer and your copy of *The World Almanac®* (included). Along the way, you'll pick up interesting information about geography, history and culture. Winner of Best Learning Product Award (Software Publishers Association).

Where in the World is Carmen Sandiego?

Playmaker Football™

You wanna play games, or you wanna play football?

Playmaker Football lets you experience the power and responsibility of a professional football coach, coaching your own team under realistic conditions. You'll build a team, balancing the strengths and weaknesses of your players. You'll also create your own plays, and teach your play-calling strategy to the computer. Play against the computer or a friend. Or send your personal playbook to a friend in another city — so he can play you without you being there! Playmaker shows more than little X's and O's. You'll see animated humans running, blocking, passing and scoring. With realistic grunts, tackles and crowd sounds.

Developed with the help of professional coaches, Playmaker Football gives you all the agony and ecstasy of professional sports.

Jam Session™

All the musical thrills without the musical skills.

While Jam Session's animated band plays back-up, you play solo by hitting any combination of keys on the computer keyboard. Amazingly, your solo riffs always stay in harmony with the band, no matter which key you hit! It's impossible to make a mistake. So you make great-sounding music without any training.

All sounds are digitally recorded from actual instruments, so they sound just like the real thing. Jam with a heavy metal, classical, jazz or country band. There's nothing you can't play with Jam Session.

Columnist John Dvorak says: "I can't do this software justice in print. It is a fabulous work. I haven't seen anything this much fun for two or three years!...It's a killer."

Winner of the Software Publishers Association Award for Best Entertainment Program of the Year, Best Sound and Best New Use of a Computer!

Shufflepuck Cafe™

Play air hockey with the scum of the galaxy!

The Shufflepuck Cafe. It's the sleaziest dive you've ever seen, but you've got to use the phone. So you stumble through its dingy entrance into the last air hockey game in the galaxy. All that lies between you and the phone are eight alien misfits, an obsolete droid, and a few "friendly" games of shufflepuck. But, hey — relax! If you lose, they'll only have contempt for you. Win, and they'll just resent you. Each alien has its own unique style of play, including how it serves, hits the puck, plays your hits, and what it says to you during the game. If you beat them all, the droid who's keeping score puts your name on a plaque behind the bar. At last there's an arcade game that's perfect for everyone. . . .so easy to play but so hard to master!

"Here was a game I could play that was actually related to my work. It's exciting when your city prospers, or falls upon hard times due to your own mismanagement. It involves a lot of strategy, but it's easy and fun to play."

— LAILE GIANSETTO, Architectural Designer, Berkeley, CA

Omni-Play™ Horse Racing

Place your bets! The ultimate race track simulation is here!

You can almost smell the excitement! No other simulation even comes close. Up to 4 players can compete and bet on long shots, triples and Exactas, or on favorites to Win, Place or Show. You define tournament rules, with up to 128 horses at each track. Create, load and save as many tournaments as you wish. Included are details of the last ten performances for every horse, complete jockey profiles, and variable track conditions. You can even purchase "tips" from reputable sources, or from some shady characters as well! Best of all, the OMNI-PLAY™ System is expandable, making video boredom a thing of the past. Separately available modules offer new experiences, more fun and greater depth. Includes two modules already installed. Distributed by Broderbund Software.

Omni-Play™ Basketball

Slam dunk your way to victory.

Unlike other simulations, The OMNI-PLAY™ System features expansion modules to increase the fun! This package include two modules. One lets you and a friend own, manage and coach your own basketball teams. Recruit from the Minors, improve your players at Training Camp, or trade for other players with varying ages, injuries and abilities. The second module gives you fast-paced on-court action with 5-on-5 ball, plus the bonus of Flow-Control — which lets you control much more than a single player. You'll control all the on-court action — including precision passing and shooting, aggressive defense and SLAM DUNKS! And future expansion modules will bring you Pro Leagues, Colleagues, Fantasy Leagues and more! Distributed by Brøderbund Software.

Superbike Challenge™

Race on the fastest Grand Prix courses.

Your 1000cc Superbike growls and rumbles beneath you. It's your turn to race on one of the world's most exciting Grand Prix courses at speeds up to 200 mph! Every perilous curve of the world's major race courses is simulated. 12 in all, including the rugged Swedish and Japanese Grand Prix courses. This unique 3-D view of the track for both players makes Superbike more fun and challenging than any other motorcycle simulation. And Superbike can be equally as thrilling when you play against your computer. On-screen instruments show speed, RPM, lap times, and more. Race against a friend or race the computer. You steer with your body — but lean too far and you'll wipe out!

Downhill Challenge™

Experience the action on the slopes!

Finally there's a ski-race simulation that really makes you feel like you're skiing! Downhill Challenge gives you an exciting 3-D head-on view of the action. You can almost feel the wind in your hair! You also get to compete in four major events: the Downhill, the Slalom, the Giant Slalom, and Jumping. While other winter sport simulations feature sports like skating, Downhill Challenge concentrates only on skiing, for more detail and more realism than any other product. You'll be especially knocked out by the speed and high-resolution color. You'll appreciate how easy it is to use, too. You don't need a manual — just point yourself Downhill and get ready for the ride of your life!

Licence to Kill™

Meet the newest James Bond...you!

It's like starring in your own James Bond movie! An evil drug lord has murdered your best friend's wife, and you, Agent 007, want revenge! Based on the newest James Bond film, this action-packed arcade thriller takes you through land, sea and air as you battle the drug-smuggling kingpin Sanchez. Six levels of play include helicopter chases, 18-wheeler chases and underwater sequences, as you face the awesome firepower of a billionaire drug lord. You'll perform unbelievable stunts like tying a helicopter to a plane in mid-air! You'll swim while dodging bullets from above, and avoiding divers from below. And in the dizzying finale, you'll close in on Sanchez himself. "All sections are nicely designed, and faithfully follow scenes from the film — just like a movie licence should." (*Computer & Video magazine*)

Wings of Fury™

Blaze your way to glory in the proud tradition of fighter pilots of the past.

Take off from a WWII carrier and pilot your Hellcat fighter-bomber through Pacific skies. Your mission is to destroy all enemy ships and island installations in your carrier area. Use your joystick to strafe, dive bomb, and dogfight. But watch out! The farther away you get from your carrier, the more hostile and skillful the resistance becomes. Brilliant graphics feature smoke pouring from damaged planes, bullets ripping into the sea, and more! Each stop for refueling and repairs requires a precarious landing on your carrier's postage stamp of a flight deck! This is not just a great flying game — it's a realistic, action-packed adventure.

Wibarm™

Untangle a twisted tale of intergalactic terror and treachery!

Alien monsters have invaded Earth and seized control of an orbiting power plant. Unless it's stabilized quickly, it will explode and destroy the entire planet. Now you — Eizel Cloud, ace intergalactic investigator — are the Earth's last hope. And Wibarm is your most versatile weapon. You can transform it into a gigantic armored robot, land cruiser or star jet. But first, you must master its operation. Your desperate mission will take you through 32 maze-filled buildings in city after city — and finally, far into space. Along the way, you'll need to collect vital tools, keys and supplies as you solve crucial puzzles. You'll use 10 different weapons to battle more than 30 huge monsters — each featured in gruesome detail. Wibarm gives you the best of both worlds — blazing arcade action and intricate role-playing challenge!

The Ancient Art of War®

The world's greatest generals send you an armed invitation.

How would you personally like to lead an army into battle against the great Genghis Khan? Or try to outfox that master military strategist, Alexander the Great? Now you can pit your own intelligence and skills against seven of the most brilliant military minds in history. The Ancient Art of War lets you plan and carry out military campaigns right down to the last detail... while your enemy conducts an historically authentic campaign against you.

Choose your own armies, weapons, battle formations. Then begin making your decisions — to attack the enemy directly, cut off his supply lines, or take him by surprise. When you think you're ready, try challenging the legendary Sun Tzu, the ancient Chinese general who literally wrote the book on war. Or use The Game Generator to create your own military campaigns from scratch. It will be an experience you won't soon forget.

"We wanted to do a war game based on real tactics and strategies. So we did a ton of research and found Sun Tzu's book. It was written 2500 years ago — Genghis Khan and Napoleon studied it. Usually, people think the way to win is to destroy the enemy. Not so. Actually, the winning strategy is to get the enemy in a position to surrender. We worked 16 and 17 hours a day out in the woods in Washington...but it's all paid off. We get phone calls and letters every day from players. They're incredibly loyal and involved."

— DAVE and BARRY MURRY,
Software Designers, Olympia, WA

The Ancient Art of War at Sea™

If you think fighting on land is a challenge...

The waves are pounding against your ship, you're getting your weapons ready for battle, when suddenly — attack on the starboard side! As you send your men racing to their battle stations, you'll be planning your defensive strategy with lightning speed.

Your enemy: any one of five of the world's most brilliant naval commanders, including the bloodthirsty pirate Blackbeard, the "Yankee Pirate" John Paul Jones, and the legendary Admiral Lord Nelson. Your mission: to sink his ships before he sinks yours.

The Ancient Art of War at Sea combines real-time excitement with the intellectual challenge of leading a navy into victory on the high seas. You can zoom in to take command of individual ships and lead the boarding parties as you engage in hand-to-hand combat on enemy "territory." Choose from 11 classic campaigns, or use the Game Generator to create your own.

Murder Club™

This steamy best seller from Japan knocks other mystery adventures dead!

The stiff was rich, and a ladies' man. There are lots of suspects. Lots of motives — love, revenge, jealousy, money, fear of exposure. He was found stabbed to death in the local college parking lot. As J.B. Howard, homicide detective, you'll grill 33 different characters. You'll comb 23 places for evidence. It's liable to take you 50 hours in all, and when you solve the case, prepare for a big shock! (Recommended for mature audiences.) This graphics/text adventure is the biggest selling game of its kind in Japan. But the plot pays homage to all your favorite American detective novels! And the menu-driven interface makes it easy because you use only three keys. You can also check your progress at any time on an on-screen graph. See why Murder Club offers more excitement than any other mystery adventure. Distributed by Brøderbund Software.

Psychic War™

In the 36th century, the most dangerous weapon in the universe is the human mind.

The Imperial Army's new psychic wave device turns the mind into a monstrous weapon. And you and your female android companion are the only ones who can stop it. You'll need to find 20 items, including maps, decoders, armor, guns and cartridges. More importantly, you must find seven key characters to add to your team of psychics. Each has a psychic ability you can't win without — powers like Suction: the ability to absorb an enemy's psychic power. And Magnify: a mysterious ability that's essential to the massive final conflict. You'll decipher dozens of clues and puzzles, and face 49 unique enemy aliens on six enemy outposts. All with the high-quality graphics that have made *Psychic War* a role-playing bestseller in Japan. Distributed by Brøderbund Software.

Curse of Babylon™

Only your magic can save Babylon from the demons within!

Babylon has been conquered by monsters! Only you can vanquish them — if you can muster the right magic and weaponry. To do this, you'll wander through forbidding wilderness and threatening dungeons, fighting off hideous demons all the way. Finally, you'll allow the spirit of warrior Gilgamesh to enter your body. Only then are you ready for the final, breathtaking conflict! The action is fast, colorful and best of all, simple to control. Perfect for anyone who wants the thrill of action/role playing without the hassle of learning a complicated program. Features over 25 fully detailed monsters, three soundtracks, SideView and Save Game features. Distributed by Brøderbund Software.

Operation: Cleanstreets™

Drug pushers are terrorizing the city. And the mayor wants you to go undercover!

Drug-pushing hoodlums are infesting the city. You're "Cleanup Harry" — an undercover cop with a reputation. And the Mayor wants you to clean up the whole city — neighborhood by neighborhood — singlehandedly. You'll be pitted against the real-life equivalents of the villains in traditional action games. But watch it. These guys are for real — and they fight dirty. It's hand-to-hand. And foot-to-head. You'll have to kick, punch and dodge. They'll run you down in the street. Attack you from buildings and windows. They'll show no mercy. And neither will you. Worst of all, once you clean up one level, there's a tougher one waiting for you! Five challenging levels in all.

SpaceRacer™

Introducing the Space Race. The bloodsport of the 25th century!

In the 25th Century, war, disease and hunger exist only in history books. Danger and excitement have disappeared from the world — except for the deadly Space Race Tournament. You're a drifter and scoundrel. But you're also the best Space Racer on Earth. So the Rulers send you to compete against the best in the universe. On three alien planets, you race on three different racetracks. Then, you head for the Finals. Use your Laser Cannon to blast other riders out of the sky, or force them into the deadly Guard Poles. Turn too wide and you'll lose power. A single slip and your opponents will ride you down...or blast you to oblivion. The Earth's honor is at stake. And so is your life! Non-stop action and colorful 3-D graphics and animation give you more excitement for your dollar than any other racing simulation.

Lode Runner®

The classic treasure
hunt — Galactic-style!

Over a million copies sold world-wide! Lode Runner starts with a nasty empire, a stolen fortune in gold, and merciless Bungeling guards. Your mission is to recover the gold taken from the Bungeling people by their own power-hungry leaders. You'll be running, climbing, solving puzzles and drilling through stone floors with your laser drill. Can you recover all the gold? That depends on how quick and clever you are . . .

Karateka™

Karateka features smoothly
animated characters.

Become a martial arts hero.

For years, you've studied karate with the Master. Now you return home to find your village burned to the ground. Even worse, your bride-to-be is a prisoner of the evil warlord Akuma. You cannot rest until you rescue her.

Fight your way past vicious palace guards until you finally engage Akuma in hand-to-hand combat. If you succeed, eternal happiness is yours.

Joshua: "To win, you have to do a bunch of different things...that's what I like. I've gotten farther than she has. She'll never beat me. No way!"

Allison: "You try to get the princess away from the bad guy. It's fun but it's hard. I've gotten inside the castle but not all the way. I like it, lots!"

— JOSHUA and ALLISON MORRIS,
Deerfield, IL

Wolf Pack™

Introducing the two finest naval simulations in history.

This visually stunning, highly realistic simulation lets you experience the real excitement and tensions of World War II naval combat — from both sides. It will satisfy the most discriminating simulation game buff, as well as anybody who loves fast-paced combat action. It's the autumn of 1942. German submarine wolf packs stalk the Allied convoy routes. You are the Escort Commander, and your ship is a mighty U.S. Naval destroyer, equipped with the latest Allied breakthroughs in SONAR, RADAR and weaponry. Or switch roles and you're the wily Nazi U-boat commander. Play against your computer or your friend. More than just a deadly battle game, this is an authentic simulation of World War II naval warfare — depicted with stunning VGA graphics. Comes with many combat scenarios, plus a construction set that lets you make up your own.

The Playroom™

In The Playroom, everything your child touches comes alive with fun and learning!

The Playroom is very special learning software for kids from preschool to early elementary. It's a fun world of games, toys and surprises. Your child starts by selecting any toy in The Playroom, and it springs to life with animation and sound. Some selections lead to activities in reading or math readiness, others with creativity, and some lead to just plain fun. Multiple levels accommodate different skill levels and age groups, and even the youngest child can control the program completely. Pepper Mouse is your child's guide to many of the activities, and there's even a cute little Pepper Mouse toy right in the package! A special Parent's Guide is also included. Open up The Playroom for your kids. You'll enhance their creativity and thinking skills, while providing them with a fun environment they'll love to play in.
