EZ-LEDGER

EZ-LEDGER is the ideal record keeping system for somebody running a small business out of their home or the self-employed professional. EZ-LEDGER uses the simplest form of bookkeeping possible. Single entry bookkeeping requires only posting transactions either under INCOME or EXPENSE.

EZ-LEDGER will keep track of expense items under any one of 99 user selected tax codes plus keeping all year-to-date and monthly running totals for each of the selected items. Expense items may be entered under DEDUCTIBLE or NON-DEDUCTIBLE type codes.

EZ-LEDGER is a strictly cash system. i.e. if you pay out monies (check, cash, credit cards etc.) then the transaction is posted under EXPENSE and if you receive monies then record them under INCOME.

EZ-LEDGER will produce INVOICES with an automatically incremented invoice number and then automatically post the data to an ACCOUNTS RECEIVABLE 'holding' file or directly to INCOME and update all totals.

The accounts receivable and accounts payable files are 'holding' files with their own running year to date totals. Transactions in these files may be automatically posted to INCOME or EXPENSE and all respective totals will be updated automatically.

EZ-LEDGER will support 80 or 132 column printers and one or two disk drives. The printer is needed for producing invoices, but optional on all other reports.

EZ-LEDGER requires 48K ram, APPLESOFT rom and DOS 3.3.
