

# World Class Quality

Made  
in  
Canada

## Lifetime Guaranteed

**AXIOM Lifetime Guarantee.**  
All AXIOM brand diskettes are guaranteed for life against manufacturing defects in workmanship and materials, and will be replaced by DIDAK Manufacturing Limited should they be defective in any way.

The name AXIOM reflects our commitment to producing premium "world class" quality diskettes. The lifetime guarantee is proof of our confidence in this premium Canadian product.

The high standard established for AXIOM diskettes is maintained by the selection of the best available materials, rigid quality assurance and testing in manufac-

turing, plus the use of unique protective packaging.

The diskette media is the highest quality substrate available anywhere. Each diskette is polished to an ultra-smooth surface and utilizes proprietary lubricants and binders to protect against costly head wear and to substantially extend AXIOM disk life.

The protective jacket is

made of a newly formulated hard 10 mil PVC which is more substantial and more resistant to scratching, smudges and fingerprints.

Unlike many other diskettes, the fibre liner is precision cut to eliminate ring fibre particles, which may cause diskette damage. An added benefit to this precision cutting is quieter drive operation. AXIOM's unique

package features a security sealed top and is especially designed for ease of use, convenient storage and protection against fluctuating environmental conditions.

Using the latest in manufacturing technologies, AXIOM is produced under the strictest of quality control conditions; over 20 tests are used to ensure a consistently reliable product.

*Every track of every diskette is tested.* AXIOM is even tested *between* the tracks to ensure perfect condition. 100% of the surface area is tested to guarantee that each

diskette is free of missing or extra pulses. Only then can you be sure of superior signal strength, clarity and consistency.

These high quality materials and AXIOM's meticulous manufacturing process result in a product which exceeds the already high standards set by industry associations and companies such as ANSI, ECMA, ISO, JIS, IBM and Shugart.

DIDAK Manufacturing Limited, a 100% Canadian owned company, has head office and manufacturing

facilities in Ontario. A network of carefully selected DIDAK distributors and dealers serve customers throughout Canada.

DIDAK Custom Service includes special formatting, packaging, software duplication and private labelling.

**AXIOM from DIDAK**  
**The World Class Standard for materials, workmanship and superior performance.**
