### SECTION I:  
**ABOUT SHOGUN**

**Preface to the Story**

In *Shogun*, you play the role of resourceful English seaman John Blackthorne, Pilot-Major of the Dutch trader-warship *Erasmus*, which is on a secret mission of trade and plunder to the Spanish-dominated Pacific Ocean.

The year is 1600, and the powerful Catholic empire of Spain and Portugal is locked in a death struggle with the upstart Protestant nations of England and Holland. The Catholic nations have spread their political and religious influence across the world, reaching as far as China and the almost mythical land of Japan, extracting great wealth in spices and precious metals. Their extensive knowledge of the Asian seaways is highly secret information coveted by English and Dutch traders. But while the European powers battle each other, a longer and even more vicious struggle is raging among the feudal lords of Japan.

After hundreds of years of anarchy, Japan was unified by the great warrior Nakamura, who became Taiko, or military ruler. But the Taiko has died, leaving as heir a seven-year-old boy, and a five-man Council of Regents to rule in his name. The dominant figures on the Council are Lord Toranaga and Lord Ishido. Each is a daimyo: powerful warrior-rulers who follow the ancient samurai traditions. Each harbors the ambition to be Shogun: supreme ruler under the divine but nearly powerless Emperor.

Toranaga and Ishido are each backed by lesser daimyos and hordes of samurai. They jockey for position, nearly evenly matched, looking for any way of bolstering their chances. Perhaps the Jesuits will swing their support behind one candidate, or hostages will neutralize a powerful supporter. The balance is delicate, and the appearance of the *Erasmus* creates excitement and new possibilities.

It is into the center of this momentous conflict that you, John Blackthorne, have been thrown, and soon you discover that the perils of the sea are almost trifling compared to the danger and intrigue among the samurai lords of Japan.

Life in Japan can be a hazardous affair. If you choose the wrong friends or confidants, you may find your head detached from your body. But strict adherence to the rules of etiquette, some judicious questions, and careful listening will enhance your pleasure, prestige, and prospects for survival.

*Shogun* is one of a new family of Infocom stories which utilize vivid graphics to enhance the story. So now, along with the quality interactive fiction that you’ve come to expect from Infocom, you can also expect beautiful artwork as well.

You’ll find that the art in Shogun is tied very closely to the story and gives you a “fine-focus” on the mood or locale as you play the role of John Blackthorne.

### Hints

*Shogun* contains on-screen hints! If you ever get stuck, just type HINT and follow the instructions on your screen. The hints generally progress from a gentle nudge to a complete answer.

Don’t let the presence or absence of hints on a particular subject affect your thinking. In fact, fake hints have been added to prevent this.

We strongly recommend that you look at only one hint at a time. Avoid the temptation to use the hints too often; this inevitably spoils, or at least lessens, the fun of solving a puzzle.

If you don’t have the will power to stop looking at the hints, you can type HINTS OFF. This will deactivate the on-screen hints (unless you RESTART or RESTORE to an earlier point).
Function Keys
As described elsewhere in this manual, many commands have abbreviations: you can type N instead of NORTH, for instance, or I instead of INVENTORY.

With function keys, you can use a single keystroke as an abbreviation for whatever you choose. You can use a function key to abbreviate a long word that you don’t like to type (like TORANAGA), or to abbreviate a commonly used command (like RESTORE), or even to abbreviate a whole sentence (like LOAD THE PISTOL). Check the reference card that came in your game package to find out how to use the function keys on your computer.

You start the story with the function keys already set to commonly used commands. To see what the function keys are set to, or to change the settings of the function keys, type DEFINE at the prompt (>) and press the RETURN (or ENTER) key. Then use your up- and down-arrow keys or mouse to highlight the setting(s) you want to change. The vertical bar (|) or exclamation point (!) is used as an abbreviation for the RETURN (or ENTER) key; so changing LOOK to LOOK means you want the RETURN (or ENTER) key automatically pressed when you use that function key. Note: Only one RETURN (or ENTER) can be included in each function key definition. Anything after the first RETURN (or ENTER) will be discarded.

You can restore all the original settings of the function keys by highlighting the RESET DEFAULTS command and pressing the RETURN (or ENTER) key. You can save any changes you make for future use by highlighting the SAVE DEFINITIONS command and pressing the RETURN (or ENTER) key; you may retrieve your previously saved definitions by highlighting the RESTORE DEFINITIONS command and pressing the RETURN (or ENTER) key.

To leave the DEFINE screen, highlight the EXIT command and press the RETURN (or ENTER) key.

Special Commands
Below are explanations for a number of useful one-word commands. In many cases, these will not count as a move. Type the command after the prompt (>) and press the RETURN (or ENTER) key. Most of these commands appear in all Infocom games, but those that are starred (*) are new.

AGAIN - This will repeat your previous input. For instance, typing TUN THE WHEEL TO PORT then typing AGAIN would be like turning the wheel to port twice in a row. You can abbreviate AGAIN to G.

BRIEF - This command tells Shogun to fully describe a location only the first time you enter it. On subsequent visits, Shogun will tell you only the name of the location and any objects present. Shogun will begin in BRIEF mode, and remain in BRIEF mode unless you use the VERbose or SUPERBRIEF commands. SUPERBRIEF tells Shogun to display only the name of a place you have entered, even if you have never been there before. In this mode, Shogun will not even mention which objects are present. Of course, you can always get a full description of your location and the items there by typing LOOK. SUPERBRIEF mode is meant for players who are already familiar with the geography. The VERbose command tells Shogun that you want a complete description of each location, and the objects in it, every time you enter it, even if you’ve been there before.

COLOR - If you are playing Shogun on a computer with a color monitor, you can type COLOR to change the colors of the text and background on your screen. This command works only on computers which support a color display.

DEFINE - This command allows you to change the settings of the function keys. See the “Function Keys” section on this page.

DIAGNOSE - Shogun will give you a report of Blackthorne’s (i.e., your) physical condition.

HINT - If you have difficulty while playing the story, and you can’t figure out what to do, just type HINT. Then follow the directions at the top of your screen to read the hint of your choice.

INVENTORY - Shogun will list what Blackthorne is carrying and wearing. You can abbreviate INVENTORY to I.

LOOK - This will give you a full description of your location. You can abbreviate LOOK to L.

NOTIFY - Normally in Shogun, the game will not notify you when your score changes. You can turn on this notification feature by using the NOTIFY command. Typing NOTIFY a second time turns the feature back off.

OOPS - If you mistype a word, such that Shogun doesn’t understand it, you can correct yourself at the next prompt by typing OOPS and the correct word. For example, if you typed ATTACK THE NINAJ WITH THE SWORD and were told “[I don’t know the word ‘ninaj’]” you could type OOPS NINJA rather than retyping the entire sentence. You can abbreviate OOPS to O.

QUIT - This lets you stop. If you want to save your position before quitting, follow the instructions in the “Starting and Stopping” section on page 9. You can abbreviate QUIT to Q.

REFRESH - This command clears your screen and redraws the display.

RESTART - This stops the story and starts it over from the beginning.

RESTORE - This restores a previously saved position. See “Starting and Stopping” on page 9 for more details.

SAVE - This puts a “snapshot” of your current position on your save disk. You can return to a saved position in the future using the RESTORE command. See “Starting and Stopping” on page 9 for more details.

SCRIPT - Tells your printer to begin making a transcript of the story. A transcript may aid your memory, but is not necessary, and will work only on certain computers. Read your Reference Card for details.

SCORE - This command will show your current score and a ranking which is based on that score.

SUPERBRIEF - Tells Shogun to give you the sparsest level of description. See BRIEF above.

UNDO - You can use this command to “back up” one move. Suppose, for example, that you found a package but didn’t know what was in it. You might type OPEN THE PACKAGE and be told “The package explodes as you open it, destroying all your possessions.” You could then type UNDO, and you would “back up” one move. Your possessions would be intact, and you could try giving the package to an enemy, or leaving it alone, or something else. Note that the UNDO command works only on certain computers with enough memory.

UNSCRIPT - This tells your printer to stop making a transcript.

VERBose - This command tells Shogun to give you the wordiest level of description. See BRIEF above.

VERSION - Shogun responds by showing you the release number and the serial number of your copy of the story. Please include this information if you ever report a "bug" in the story.

WAIT - This causes time in the story to pass. Since nothing happens until you type a sentence and press RETURN (or ENTER), you could leave your computer, take a nap, eat dinner, then return to the story to find that nothing has changed. You can use WAIT to make time pass in the story without doing anything. For example, if you saw two soldiers arguing, you might WAIT to see what they will do; if you were aboard a ship, you might WAIT to see where it goes. You can abbreviate WAIT to W.
>LOOK
You are at the helm of the tradeship **Dek Twintig**, about to make port in **Goro**.

>TURN THE WHEEL TO STARBOARD
You quickly turn the helm to starboard just avoiding the red buoy. The **Dek Twintig** responds, veering back toward the center of the channel.

>LOOK AT THE CHANNEL
The channel surrounds you on both sides, about twice as wide as your ship. The ship seems to be veering off to the right side of the channel. You remember your recent close call as you hear the lookout yell, “Green buoy sighted, Captain!”

>STRaighten THE WHEEL
You quickly straighten the wheel and the ship immediately centers herself in the channel.

>Look AT THE CHANNEL
The channel surrounds you on both sides, about twice as wide as your ship. The lookout yells, “Channel turning starboard, Captain.”

>TURN THE WHEEL STARBOARD
You turn the wheel to starboard, expertly following the center of the channel.

>Look AT THE CHANNEL
The channel surrounds you, about twice as wide as your ship. The channel opens up into Goro Bay about two hundred yards ahead.

>wait
Time passes...
The ship moves deeper into the channel propelled by the stiff winds.

>wait
Time passes...
The ship moves deeper into the channel propelled by the stiff winds. The ship seems to be moving away from the center towards the left side of the channel. You hear the lookout yell excitedly, “Approaching red buoy dead ahead!” Startled, you look to the left for the buoy but it’s too late because you’ve just left the channel and run aground. Luckily, you’re on a sandbar, and not the rocks.

>undo
[undo done]

>TURN WHEEL TO STARBOARD
You quickly turn the helm to starboard just avoiding the red buoy. The **Dek Twintig** responds, veering back toward the center of the channel.

>look at the channel
The channel surrounds you on both sides, about twice as wide as your ship. The ship seems to be veering off to the right side of the channel. You remember your recent close call as you hear the lookout yell, “Green buoy sighted, Captain!”

>straighten wheel
You quickly straighten the wheel and the ship immediately centers herself in the channel.

>look at the channel
The channel surrounds you on both sides, about twice as wide as your ship. The lookout yells, “Channel turning starboard, Captain.”

>turn the wheel starboard
You turn the wheel to starboard, expertly following the center of the channel.

>look at the channel
The channel surrounds you, about twice as wide as your ship. The channel opens up into Goro Bay about two hundred yards ahead.

>wait
Time passes...
The ship moves deeper into the channel propelled by the stiff winds.

>wait
Time passes...
The ship moves deeper into the channel propelled by the stiff winds. The ship seems to be moving away from the center towards the left side of the channel. You hear the lookout yell excitedly, “Approaching red buoy dead ahead!” Startled, you look to the left for the buoy but it’s too late because you’ve just left the channel and run aground. Luckily, you’re on a sandbar, and not the rocks.

>undo
[undo done]
Glaz faces you and says, "Captain Jeremiah Wicks, I hereby place you under arrest in the name of Admiral Sukata for the crime of piracy." As he speaks the guards move towards you.

> I AM NOT A PIRATE
The guards continue their advance. Your crew is not sure what to do.

> I AM CAPTAIN ALEXANDER WICKS
You hurriedly explain to Glaz that Jeremiah Wicks is your half-brother, a scourge to your family and an enemy of England and all nations. Glaz looks at you, now unsure of his charge. He turns and speaks once more to Sukata. Sukata listens intently then orders his men to stop.

About the Authors

Dave Lebling was born in Washington, D.C., in a hospital that was torn down soon thereafter. He grew up in suburban Maryland. He attended the Massachusetts Institute of Technology and worked at MIT's Laboratory for Computer Science, where he developed an interest in computer entertainments. He co-authored the original mainframe Zork. He co-authored Zork I, Zork II, Zork III, and Enchanter, and wrote Starcross, Suspect, Spellbreaker, and The Lurking Horror on his own. He is married and lives in a suburb of Boston. His long-range ambition is to have a library with room enough for all his books to be taken out of storage. His short-range ambition is to keep squirrels out of his birdseed.

James Clavell is the author of numerous international best-sellers and has won worldwide acclaim for his work. Among his books are Shogun, Tai-Pan, King Rat, Whirlwind and Noble House. Mr. Clavell says, "I like to think of myself as a citizen of the world, and we go wherever necessary, my wife and I, live wherever necessary, to pursue my craft: storyteller."

SECTION II:
ABOUT INFOCOM'S
INTERACTIVE FICTION

An Overview:
What is interactive fiction?

Interactive fiction is a story in which you are the main character. Each interactive story, such as Shogun, presents you with a series of locations, items, characters, and events. You can affect the direction of the story by moving from place to place, using the objects you find, and interacting with the other characters.

An important element of interactive fiction is puzzle-solving. Think of a locked door or a storm at sea not as a permanent obstacle, but merely as a puzzle to be tackled. (Find the key that unlocks the door, or figure out how to navigate through the storm.)

In Shogun, time passes only in response to your input. Nothing happens until you type a sentence and press the RETURN (or ENTER) key, so you can plan your turns as slowly and carefully as you want. Shogun measures your progress by giving you a score. You'll get points for solving puzzles and for reaching new locations. A perfect score is your goal; making sure you have fun getting there is ours.

Starting and Stopping

Starting the story: To load Shogun, follow the instructions on the Reference Card in your package.

On your screen, you will see a description of the opening location of the story, Bridge of the Erasmus, followed by the prompt (>), indicating that Shogun is waiting for your first input.

Here are a few inputs for you to try at the first several prompts. After typing each input, don't forget to hit the RETURN (or ENTER) key.

> INVENTORY
> TAKE THE WHEEL
> SIT IN THE CHAIR
> TURN THE WHEEL TO STARBOARD

You should now have a feel for interacting with the story. You decide what to do next.

Saving and restoring: It will probably take you several days to complete Shogun. Using the SAVE feature, you can continue the story at a later time without having to start over from the beginning, just as you can place a bookmark in a book you are reading. Even if you aren't about to stop playing, it's useful to SAVE before (or after) trying something dangerous or tricky. That way, even if you get lost or "killed" in the story, you can return to your saved position.

To save your place, type SAVE at the prompt (>), and then press RETURN (or ENTER). Then follow the instructions for saving and restoring on your Reference Card. Some computers require a blank SAVE disk, initialized and formatted. Using a disk with data on it (other than Shogun saves) may result in the loss of that data, depending on your computer. You can save your position as often as you like by using additional blank disks.

Any time you want to return to a saved position, just type RESTORE at the prompt (>), and hit RETURN (or ENTER), Then follow the instructions on your Reference Card. You can then continue the story from your save.

Quitting and restarting: If you want to start over from the beginning, type RESTART and press the RETURN (or ENTER) key. (This is usually faster than re-booting.) Shogun will ask you to confirm this command.

If you want to stop entirely, type QUIT and press RETURN (or ENTER). Once again, Shogun will ask to make sure this is really what you want to do.

Remember: when you QUIT, you must SAVE if you want to return to your current position in the story.
Communicating with Infocom's Interactive Fiction

In *Shogun*, you type your commands in plain English each time you see the prompt (>). Most of the sentences that *Shogun* will understand are imperative sentences. See the examples below.

When you have finished typing your input, press the RETURN (or ENTER) key. *Shogun* will then respond, telling you whether your request is possible at this point in the story, and what happened as a result.

*Shogun* recognizes your words by their first nine letters, and all subsequent letters are ignored. For example, *Shogun* would not be able to distinguish between DEMONSTRATION, DEMONSTRATIVE, and DEMONSTRATOR.

To move around, just type the direction you want to go. Directions can be abbreviated: NORTH to N, SOUTH to S, EAST to E, WEST to W, NORTHEAST to NE, NORTHWEST to NW, SOUTHEAST to SE, SOUTHWEST to SW, UP to U, and DOWN to D. IN and OUT and PORT, STARBOARD, FORE and AFT will also work in certain places.

*Shogun* understands many different kinds of sentences. Here are examples, using objects and characters that don't necessarily appear in *Shogun*:

>`WALK TO THE NORTH`
>`WEST`
>`NE`
>`DOWN`
>`TAKE THE APPLE`
>`OPEN PANEL`
>`READ THE RUTTER`
>`LOOK AT THE COMPASS`
>`TURN WHEEL TO PORT`
>`LIFT THE SWORD`
>`TEAR THE CLOTH`
>`STEER TOWARDS BAY`
>`GIVE THE CHOPSTICKS TO THE WOMAN`
>`CLIMB INTO THE PIT`

You may use lower-case letters and words like A and THE if you wish. *Shogun* doesn't care one way or the other.

You can use multiple objects with certain verbs if you separate them by the word AND or by a comma. Some examples:

>`TAKE THE PISTOL AND THE BAG`
>`DROP THE SWORD, THE COMPASS, AND THE TOWEL`

You can include several sentences on one line if you separate them by the word THEN or by a period. Each sentence will be handled in order, as though you had typed them individually at separate prompts. For example, you could type all of the following at once, before pressing the RETURN (or ENTER) key:

>`TAKE THE ROPE. GO UP THEN TURN THE WHEEL TO PORT`

If *Shogun* doesn't understand one of the sentences on your input line, or if an unusual event occurs, it will ignore the rest of your input line.

The words IT and ALL can be very useful. For example:

>`EXAMINE THE APPLE. TAKE IT. EAT IT`
>`CLOSE THE HEAVY METAL DOOR. LOCK IT`
>`TAKE THE KIMONO. PUT IT ON`
>`TAKE ALL`
>`GIVE ALL BUT THE PISTOL TO THE PRIEST`

The word ALL refers to every visible object except those inside something else. If there were an apple on the cabinet and an orange inside the cabinet, TAKE ALL would take the apple but not the orange.

There are various kinds of questions that *Shogun* understands. Examples include: WHO IS [someone], WHERE IS [something or someone], and WHAT IS [something]. For example:

>`WHO IS TORANAGA?`
>`WHAT IS A SAMURAI?`
>`WHERE IS OSAKA?`

When you meet other people in *Shogun*, you can talk to them by typing their name, then a comma, then whatever you want to say to them.

>`PRIEST, HELLO`
>`YABU, TELL ME ABOUT THE PLAN`
>`MARIKO, GIVE ME THE DAGGER`

Sometimes *Shogun* "knows" you mean to answer a question posed by another character. In these situations you can omit the name and comma. For example if Mariko asked, "What's your favorite color?" you could answer:

>`YELLOW`

You can also ask questions of characters by using the form ASK [someone] ABOUT [something]. For example:

>`ASK OCHIBA ABOUT THE SAMURAI`
>`ASK OMI ABOUT ISIDO`
>`ASK YABU ABOUT THE PLAN`

Keep in mind, however, that most people don't care for idle chatter; you should listen to others and answer their questions. Often your actions will speak louder than your words.

*Shogun* tries to guess your intention when you give incomplete information. When it makes a guess, it will tell you. For example:

>`UNLOCK THE DOOR [with the key]`

The door is now unlocked.

If your command is ambiguous, *Shogun* will ask you to clarify. You can answer these questions simply by supplying the missing information at the very next prompt. For example:

>`GIVE THE PROCLAMATION`

Who do you want to give the proclamation to?

>`THE QUEEN`

The queen smiles as she accepts your gift.

Tips for Novices

1. Draw a map. It should include each location, the connections to adjoining locations, and any interesting objects there. Remember, there are 10 possible directions (NORTH, SOUTH, EAST, WEST, NORTH-EAST, NORTHWEST, SOUTHEAST, SOUTHWEST, UP, and DOWN) plus IN and OUT, PORT, STARBOARD, FORE and AFT.

2. EXAMINE all objects you come across in the story.

3. TAKE as many things as you can carry. Most objects that you find are important for solving the puzzles that you'll run into.

4. SAVE your place often, so that if you mess up or get "killed," you won't have to start over from the beginning. See page 9 for instructions.

5. Read the story carefully! There are often clues in the descriptions of locations and objects.

6. Try everything you can think of. Even strange or dangerous actions are fun and may provide clues; you can always save your position first. Here's a silly example:

>`GIVE THE BROKEN COMPASS TO TORANAGA`

Toranaga scornfully refuses your offer. He continues to look in the bushes for his dagger.

Thus, you discover that maybe giving something else to Toranaga (perhaps your dagger?) might be better.

7. There are many possible routes to the end of *Shogun*. If you get stuck on one puzzle, move on to another. Some puzzles have more than one solution; other puzzles don't need to be solved at all. Sometimes you will have to solve one puzzle in order to obtain the item(s) or information you need to solve another puzzle.
8. Play Shogun with a friend! Different people may find different puzzles easy and can often complement each other.

9. If you really have difficulty, you can type HINT. The screen will then show you a list of questions to which you can get answers. (Simply follow the instructions at the top of your screen to see the hint of your choice.) You don’t need to use the hints to enjoy the story, but it will make solving the puzzles easier.

10. Read the sample transcript on page 6 to get a feel for how interactive fiction works.

11. You can word a command in many different ways. For example, if you wanted to stop the ship, you could type in any of the following:

> DROP THE ANCHOR IN THE WATER
> THROW THE ANCHOR IN THE WATER
> PUT ANCHOR IN WATER

If you type a sentence that Shogun doesn’t understand, try rephrasing it or using synonyms. If Shogun still doesn’t understand, you’re probably trying something that isn’t important for completing the story.

Common Complaints

Shogun will complain if your input confuses it completely. Shogun would then ignore any further sentences on your input line. (Certain events, such as an attack, will also cause Shogun to ignore any additional sentences on your input line, since the event may have changed your situation drastically.) Here are some of Shogun’s complaints:

[I don’t know the word ________] That word is not in the story’s vocabulary. It may help to use a synonym or rephrasing the command; more likely, you’re just barking up the wrong tree. Shogun recognizes over 1200 words, all that you need to use and most that you’re likely to use. However, Shogun uses many words in its descriptions that it will not recognize in your inputs. So, you might read, “The moon casts violet shadows across the crater,” but discover that Shogun doesn’t know the words MOON or SHADOW or CRATER in your input. When this happens, you can assume that you don’t need to refer to those things to complete the story; they are there only to create a more vivid image of your location.

[I think there’s a verb missing in that sentence!] Unless you are answering a question, each sentence must have a verb (or one of the special commands). Among the most important verbs that Shogun understands are TAKE, DROP, PUT, GIVE, LOOK, READ, EXAMINE, OPEN, CLOSE, ENTER, EXIT, EAT and WEAR. There are many more. Remember: you can use a variety of prepositions with your verbs. (For example, LOOK can become LOOK AT, LOOK INSIDE, LOOK BEHIND, LOOK UNDER, LOOK THROUGH, and so on.)

[I can’t understand that many nouns with ________] Shogun recognized your verb, but it can’t understand so many noun “phrases” with it. For example, Shogun may recognize SKIP but not SKIP THIS PART.

You can’t see any ________ right here!] The object that you referred to is not visible. It may be somewhere else, or it may be present but in a closed container.

You can’t use more than one object at a time with ________] You can use multiple objects (that is, nouns or noun phrases separated by AND or a comma) or the word ALL only with certain verbs, such as TAKE, DROP, and PUT. For example, EXAMINE will not work with multiple objects; you couldn’t say EXAMINE ALL or EXAMINE THE BOWL AND THE SWORD.

There isn’t anything to ________] You used the word ALL, but there aren’t any appropriate objects visible.

Sorry, but I don’t understand. Please say that another way, or try something else.] The syntax (sentence structure) you used is not among the hundreds of syntaxes that Shogun recognizes. For example, SIT UNDER THE TREE and SKIP AROUND THE MAYPOLE are syntaxes that Shogun wouldn’t recognize. There’s a limited amount of space in the program, so syntaxes that are less common or not useful aren’t included. Try rephrasing the sentence.

I beg your pardon?] You pressed the RETURN (or ENTER) key without typing anything.

We’re Never Satisfied

Here at Infocom, we’re constantly trying to “push back the envelope” and explore the possibilities of this fledgling medium. Your input is important. If you liked or disliked the story, or some section of it, or if you found a bug, or if you think a certain puzzle was too hard or too easy, or if you have some other suggestion, drop us a note! We love every excuse to stop working, and a letter from you is just such an excuse!

Quick Reference Guide

1. To start the story ("boot up"), see the separate Reference Card in your Shogun package.

2. When you see the prompt (>) on your screen, Shogun is waiting for your input. There are four basic kinds of sentences or commands that Shogun understands:

   A. Directions: To move from place to place, just type the direction you want to go: NORTH, SOUTH, EAST, WEST, NORTHEAST, NORTHWEST, SOUTHEAST, SOUTHWEST, UP, DOWN, IN, or OUT. FORE, AFT, PORT, and STARBOARD work on a ship.

   B. Actions: Just type what you want to do. Sometimes you will be asked to type in a command, but you can also type in a word or phrase. For example: READ THE BOOK or OPEN THE DOOR or LOOK THROUGH THE WINDOW or GIVE THE BALL TO THE CAT. You can also say things to other characters. For example: TALK TO THE MAN.

   C. Commands to other characters: Talk to characters in the story by typing their name, then a comma, then what you want to say to them. For example: FRED, HI or OLD MAN, GIVE ME THE TROMBONE.

   D. Special commands: These give you information, such as INVENTORY, or affect the state of the program, such as VERBOSE. A list of these appears in the "Special Commands" section on page 4.

3. After typing your input, you must press the RETURN (or ENTER) key before Shogun will respond.

4. Your screen display includes a status line which tells you the section of the story you are in, your score, and the number of moves you have made.

5. You can pick up and carry many of the items you'll find in the story. For example, if you type TAKE THE SAMURAI SWORD, you will then be carrying it. Type INVENTORY to see what items you have.

6. When you want to stop, save your place in the story, or start over, read "Starting and Stopping" on page 9.

7. If you have trouble, refer to the specific section of the manual for more detailed instructions.
