# WE WANT YOU!

- Are you a talented machine code programmer?
- Could you write a program at least as good or better than the program you have just purchased?
- Have you already written such a program?
- Would you be interested in having your program distributed 'WORLDWIDE' by one of the leading publishers of entertainment software.

If you can answer yes to the above questions why not forward a sample on disc of your program to our corporate headquarters in the USA where a preliminary evaluation will take place.

If the reviewers consider that it warrants a closer look, it will be sent to our head of programming in London England, where a detailed analysis of your abilities will take place. In many instances at that point an offer to you for 'world publication' rights might follow.

NB. In order to speed all processes please make the following checks!

- Have you included all instructions needed to play or operate your program?
- Have you included with your disc your Name, Contact Address, Telephone No, Age.
- If you require your program to be returned please enclose a pre-stamped envelope with your return address.

Mastertronic International Inc. warrants a total non disclosure of your program unless a prior agreement in writing is reached between ourselves.

Programs of interest include-  
Productivity programs of all types including utilities.  
Arcade games of a high quality.  
Adventure games and strategy games.

Address your replies to  
The Head of Software

# INFINITY MACHINE

- Q:** What is the Infinity Machine?
- A:** A unique and revolutionary accessory for the Commodore 64 and 128. This powerful cartridge now lets you effortlessly play all those impossible games without being killed!
- Q:** Sounds difficult.
- A:** It's Simple - Just plug into your C64/128 and press a button to activate the Infinity Shield.
- Q:** How does it work?
- A:** All the thousands of published action and animated games that use a programming device called "Sprite collision detection", are disabled by the Infinity Machine and the Infinity Shield protects the player from being shot or crashing!
- Q:** What can I now do in a game that I couldn't before?
- A:** Activating the cartridge enables you to:- "Enter a game at any level you choose", "Explore all the areas and levels of the game and find the parts of the game you didn't know existed without being killed." Deactivating the cartridge at any point you choose enables you to continue to play the game totally normally.

The Infinity Machine is brought to you at \$24.99 by Mastertronic, producers of incredible value Commodore 64/128K software such as Slugger, 5-a-side Soccer and The Last V8 all available at \$9.99.
