

Satou-Comme

GAMEPLAY

The main objective in this game is not just to shoot first and think about it later, in fact it may be to your advantage to run, thus applying the "avoidance is better than pain" gameplay strategy.

In order to rescue Corrine you must find the way to unlock the series of doors which lead to the laboratory. There are three types of doors to unlock before reaching the final door to Una Cum's lair, standard doors, mauve doors and gold doors, and you must find and use the appropriate key before locating the three snake brooches which will unlock the door to the laboratory.

Throughout the game you will be presented with seemingly impossible situations. However by taking and breaking a cabbala symbol, traps are triggered off which are a combination of helpful and sometimes decidedly unhelpful things which can sometimes act to your advantage and sometimes not! Some symbols can be false so knowing which to take is essential.

Una Cum's evil minions will do their best to prevent you from reaching Lady Corrine, but it is possible to destroy them, albeit temporarily, by using the scrolls, amulets and masks available. Mask magic is very powerful and should be used carefully. Wearing armour will help to protect you from Una's minions, and eating the food and taking the restorative fluids will raise your energy levels.

COMMODORE 64/128

CONTROLS – JOYSTICK ONLY

STORM – JOYSTICK PORT 1 AGRAVAIN UNDEAD – JOYSTICK PORT 2

Left – Turn left
Right – Turn right
Forward – Forward
Fire button – Fire
