# IT'S A MIRACLE!

## THE MIRACLE PIANO TEACHING SYSTEM

This major technological breakthrough makes piano lessons fun! Because you're playing to learn...not just learning to play. The minute you touch *The Miracle Piano Teaching System*, you're making music. And through a unique

Exciting, arcade-quality video games...learn while you play!

inter-active system, *The Miracle* creates a custom approach to learning the keyboard that is completely personalized. You

play – and learn – at your own pace, at your own level, whenever you want.

Hundreds of lessons teach you all styles of music: classical, rock, jazz, contemporary and country. By the end of the first lesson, you won't just be playing, you'll be playing along with the built-in Miracle Orchestra. (Imagine a jazz guitar – or saxophone – accompanying your tune.)

Over 200 lessons and from 40 to 100 musical pieces included.

Before long, you'll be able to read music, play songs in rhythm, and perform two-handed piano pieces. Using Artificial Intelligence Technology, *The Miracle*

monitors each lesson and builds a series of personalized exercises just for you. And by borrowing the fun of video games, it makes kids (even grown-up kids) want to learn. It doesn't matter whether you're 6 or 96 – *The Miracle* brings the joy of music to everyone.

Learn at your own pace, and at your own level.

As a stand-alone instrument, *The Miracle* rivals the music industry's most sophisticated MIDI consoles, with over 128 digital instrument sounds and effects, 49 full-sized velocity sensitive keys, foot pedal, 4" speakers, and stereo earphones. It's designed to work with your Nintendo Entertainment System, Super Nintendo Entertainment System, IBM PC Compatible, or Commodore Amiga.
