BANTAM INTERACTIVE FICTION

**O**n July 1, 1968, the three existing nuclear powers, Britain, the United States and the USSR signed the Nuclear Non-Proliferation Treaty, agreeing to limit the spread of nuclear weapons. In addition to the publicly acknowledged terms of this treaty, there were four secret protocols, or standards for behavior. The Fourth of these forbade participating nations from covertly transporting nuclear weapons, in any form, into the territory of another nation for purposes of detonation or aggression. For nearly twenty years, no nation has dared to break the Fourth Protocol—until now.
