

Program: MAKE-A-BOX

Help Card No. 3

The program enables you to make different boxes on the screen.

You may choose to:

1. Make a box
2. See a box

MAKING A BOX

You must choose the colours for your box: a main colour and two others. When you are asked if you are happy with your choice press Y or N .

You will be asked a number of questions such as:

Is the base square or rectangular?

Is there a label on the box?

Does the box have a lock?

The type of box which is made will depend upon how you answer the questions.

When the box has been made you can either keep it or start again.

If you decide to keep the box you will be asked some more questions such as:

Of what material is your box made?

What is special about your box?

To whom does your box belong?

To make your box sound interesting you will have to think about each question.

When you have answered all the questions you may save the picture and the information on a data disc.

LOOKING AT A BOX

You can only look at a box if one has been made and saved on a data disc.

Insert your data disc and press **RETURN** .

The picture of the box will appear and the information about the box will be shown.

When you have finished looking at the information you will have 5 choices:

1. See the information again
2. Dump the picture
3. Print the information
4. See another box
5. Finish

Do not choose to dump the picture or print the information unless you know how to do it. The information is in the manual.
