"CHILDREN'S WORK" edited by Mike Matson

"IF YOU WERE A PIRATE . . ." — Mike Partridge, Anne Sly, Dave Cowell and Mike Matson

ARTWORK by Dave Cowell

ACKNOWLEDGEMENTS

Thanks to the following:

Andrew Vasey, for sowing a seed

Bruce Dixon and The Logic Shop, High Street, Armadale, Melbourne for lending so many BBC systems to Maribyrnong Primary School and the Western Region Curriculum Centre that, for a short while, the shop's entire stock of Beebs seemed to be out on loan

Ian Dawes, Terry Robertson (and the children) of Maribyrnong Primary School, Maribyrnong, Melbourne for agreeing to the request to 'try out' a couple of the programs and then proceeding to go utterly berserk on a 'Box of Treasures' project (or is it theme?)

The staff and children of Mornington Peninsula Community School, Victoria, for finding some bugs in early versions of the software.

Children of Monks Abbey C.P., Skegness C.J. and Mount Macedon Primary Schools.

Vicky, for Aussie hospitality.

Ross Schnioffsky (Computer Consultant) and Marlene De Lorenzo (Music/Drama Consultant) of the Western Region Curriculum Centre, Footscray, Melbourne for their invaluable contributions to the curriculum ideas.

All the Melbourne teachers who were conned into attending a micros workshop so that their brains could be picked for even more ideas.

Anne Sly for her Taswords.

Mike Partridge for his poetic offerings and the never-ending book list.

Dave Cowell for his stories, the non-computer art work, the only aesthetically-pleasing computer screen, and many artistic suggestions.

All the performers and technical wizards in the audio productions especially John Stone, Tim Arnold (the one with the sexy voice) and Andy Hitchcock — Pete and Ian with their miniature parts — an extra special thanks to young Lorraine and Ian who performed like professionals after only a very short time with their scripts — and David Rodgers and Karen Jones who were dragged away from their mikes in the radio studio to pretend they were flying in a space ship and were offered no explanations.

Mike Matson 1985
