The computer has opened up a whole new world of games. Go beyond the games of fast reflexes and zapping aliens and you reach into that world. The computer takes on a life of its own. Adventure and strategy games start where arcade games finish. Here is the world of imagination and thought. MIND GAMES are a range of programs designed to stimulate that imagination and take you into new and strange worlds.

Sophisticated graphics, and great presentation are all part of the package.

Strange what bets you'll accept after a few pints in the Local. Stay a night in the Major's old house, 'Easy' you said 'just because it's been empty for 30 years'.

These words echo in your head as the front door closes, and try as you will, you can't get it open again . . .

Spine-chilling, blood curdling — featuring state of the art multi-screen graphics in goriest detail.
