ESCAPE FROM PRISON PLANET

Written by Peter Clark

You have been found guilty by the Federal Court on Planet Earth of a serious crime. However as the jury's decision was not unanimous, Article 27 of the Greater Laws of Earth has been invoked by your defence. This means that you will be transported to the Galactic Prison Planet and will be given the chance to escape and return to Earth where, if you are successful, you will receive an official pardon.

This text adventure game understands all the standard adventure commands i.e. North, East, South, West, Up and Down which can be abbreviated to N, S, E, W, U, D. Some useful verbs are EXAMINE, LOOK, GET, DROP, GIVE, UNLOCK and many more. Other important commands are INVENTORY or (I) will give you a list of what you are carrying, SAVE will save the game position to tape and LOAD will restore a previously saved position from tape. RAMSAVE (RS) will save the game position to memory and RAMLOAD (RL) will restore a position from memory.
