THE AIM OF THE GAME

INTO AFRICA

ZX Spectrum, ZX Spectrum Plus, ZX Spectrum 128 and ZX Spectrum +2.

SCENARIO

The action takes place in an area of Africa inhabited by 35 tribes (including pygmies). The tribes have lived peacefully for many years under the rule of Chief Kasula the holder of the Golden Mask. But now Chief Kasula is dying from a rare jungle fever and the mask has been stolen. The tribes have drifted apart and face extinction when their land is invaded by rebel forces from the neighbouring country to the south. The rebels are desperate for supplies and are attacking the villages.

Your task is to find the mask and reunite the tribes in order to defeat the rebels.

LOADING

Spectrum Cassette

48K ZX Spectrum, ZX Spectrum Plus or ZX Spectrum 128 with cassette player, ZX Spectrum +2.

You are advised to disconnect all hardware from the rear edge connector. Unless using a ZX Spectrum +2 connect a cassette player to the computer in the usual manner. ZX Spectrum +2 and 128 users should select 48K mode. Rewind the cassette if necessary, enter LOAD ~ on the computer keyboard and press the ENTER key. Press the Play key on the cassette player. The game takes a few minutes to load.

CONTROLS

The entire game is controlled via three keys: 'm', 'n' and 'space'.

COMMANDS

The bottom third of the screen shows which commands are available to you. The current command is highlighted. To select a command, position the highlight using the keys 'm' and 'n' then press 'space' to carry out the command.

- 1 CHANGE Allows you to change the current character. Only the characters that have been recruited are shown. There are 40 controllable characters and 8 radio operators.
- 2 STATUS Shows the status of the current character's strength, location, petrol, men, supplies and water. Strength is dependent on water and supplies.
- 3 NIGHT When all the characters have completed their moves enter this command. All rebels and poachers make their moves at night. Combat takes place at night.

THE AIM OF THE GAME

- 4 MAP Shows the portions of map so far collected by the professor.
- 5 RECRUIT When a character moves onto the same location as an unrecruited character, this command will recruit him. (Depending on his allegiance).
- 6 DRIVE The five main characters can use this command to drive a jeep. This allows them to move further each day and to move in the dark. You cannot drive through jungle, mountains or lakes.
- 7 WALK If a character is driving this command allows him to leave his jeep.
- 8 RECORD Gives the option of saving the current game position or loading a previously saved position.
- 9 INFO Shows the status screen and a chart of the surrounding locations and who is occupying them.
- 10 MOVE Advances the character to the location which he is facing.
- 11 ROTATE This command allows a character to face a new direction. The 'm' and 'n' keys are used to rotate the character and the space is pressed to select direction.
- 12 RADIO If your character is at a radio station or at a warden's station he may call up the 8 radio stations. You will be shown a chart of the area surrounding the radio station and the occupants of that area.

PLAYING THE GAME

The location of the mask is shown on a map. The map is in ten sections which are spread throughout the region. Only Professor Caine can piece together the map. Once the map is complete Warden Harry Smith can use it to locate and retrieve the mask. He should then return the mask to Chief Kasula. This will give the player control over all the characters.

Most characters can be recruited individually if approached by someone who has their allegiance. Since Kasula holds most of their allegiances he must first be cured by a vaccine that only Doctor Awari can administer (she has got to find it first).

The rebels will invade in waves of 40 units at a time. Between the waves of rebels grass fires will sweep the land. The fires will destroy everything in their path (only on the flat plains). Fires can be put out by the characters, but they should only attempt to put out burning grass otherwise they may be killed.

The land is also occupied by many animals such as lions, elephants, zebra etc. All the people in the area including rebels have respect for animals and cannot move onto land on which an animal is standing. This means that the rebels are diverted by animals. There are, however, big game poachers who will systematically kill the animals (thus making it easier for the rebels). The poachers can be killed by your characters.

It should be noted that the game will only end when you have successfully completed the task. It is up to the player to decide if the mission has become impossible, eg. Kasula dead or Warden Harry Smith killed before delivering the mask.

OBJECTS

Supplies can be found at all villages, radio huts, missionary huts, warden stations.

Water is taken from lakes.

Petrol can be found at radio huts, missionary huts, and warden stations.

Vaccine can be found at the village of Juba.

The mask can be found east of the village of Talodi.
