The incredible atomic spreadsheet!

Easy to learn, easy to use and amazingly easy to forget, InvisiCalc proves that there's more to accounting than meets the eye.

InvisiCalc provides hours of fun — both at home and at the office — by solving your problems in seconds, and then letting you guess at the answers.

Meanwhile it eliminates the need for expensive monitors, printers, document shredders and photocopiers to improve your picture on that unseen bottom line!

What you can't see can't hurt you!

In test markets across the Western Hemisphere, users have been lavish in their praise of InvisiCalc!

"Beautiful! Leaves absolutely no audit trail!" — J.R., Buenos Aires

"We used to rely on flash paper. Now we depend on InvisiCalc!" — V.C., Atlantic City

"It's impossible to make a mistake!" — R.N., San Clemente

"Deficit? What deficit?" — R.R., Washington, D.C.

"Our P&L's never looked better!" — X.C., Braniff Airlines

Infinite Compatibility!

InvisiCalc is precision engineered to operate perfectly in literally every piece of data processing equipment known to man. As of today, this phenomenal program has been translated to run in over 117 languages — including Braille!

Figure 2

Next time, you draw a blank,
do it with InvisiCalc!

When it comes to working with
numbers, nothing's better!

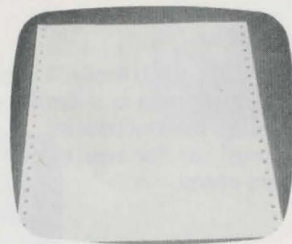

Figure 3

You can do things with InvisiCalc you can't do with any other software!

1. Pile on the food! That's right. InvisiCalc actually works just like a paper plate. Pizza? Sure! Ice cream? Even better!

2. Always grasp firmly. A good, hard squeeze or a fist-like grip brings out the best in InvisiCalc. For even more fun, try pliers!

3. Write on the diskette. This insures proper use of our "automatic dating" feature. Be sure to use a rusty, ballpoint pen!

4. Store in bent condition. This ensures proper rounding!

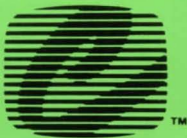

5. Store in a hot, humid place.

6. Regularly run by magnetic fields. Better yet, tape it to your TV! This eliminates bad auras and vibes.
