THE ISLAND

ZX SPECTRUM 48K

At the very heart of the 'Ring of Fire', the chain of volcanoes that border the Pacific Ocean is the tip of a once mighty volcano known simply as 'The Island'. Looking deceptively innocent on the map, The Island is known to have claimed the lives of many heroic explorers who have dared to try to reveal its secrets.

But what are the secrets of The Island? Many dark legends make up its history – legends of ancient civilisations, magnificent temples and mystical forces: the very stuff of exploration. And yet what drives you onward in this most perilous quest are the stories of a fortune – a magnificent hoard of treasure which is said can be found deep within. In all your years of exploration never have the stakes been so high.

But as you leave the runway on your first reconnaissance flight, up into the ominous grey skies, you can hardly imagine the fate which will befall you – as you near your destination, your plane plunges into a fierce electrical storm. Now, with your instruments and radio dead your last recollection is of the altimeter spinning frantically round: 1500 feet . . . 1000 . . . 500 . . .

GENERAL LOADING & RUNNING INSTRUCTIONS
