THE LAST WARRIOR

HGC Software presents ...

THE LAST WARRIOR

Within the borders of a vast country, the inhabitants of a small village called the Bay of Oysters lived peacefully, free of all sorcery and witchcraft.

However, after several decades Morgoth, the Terrible, returned to dominate the people. He subjected them to lifelong and pitiless slavery. Happy was the day when the WARRIORS, a brave new race of courageous knights, drove Morgoth from their land. Now, alas, cruel Morgoth has returned to hide away the secret statue of the villagers. Prayer is in vain, all hope is lost.

From generation to generation, slowly the WARRIORS have disappeared. Only you, the last WARRIOR live on. Only you have the power to defeat Morgoth to recover the statue and return it to its true owners.

This adventure extends to some seventy rooms and has a 106 word vocabulary. You play by typing your commands of 1 to 2 words. You can abbreviate the commands by typing their first four letters only, e.g. EXAMINE SWORD --> EXAM SWOR, or SAY HELLO --> SAY HELL.
