

Reference Card

In this box you should find the main manual, this reference card, a letter to Prince Morkin from Rorthron the Wise, The Lords of Midnight chronicles and your CD-ROM. If any of these items are missing, please consult with your software dealer.

Installation and Loading Instructions

CD-ROM

To enter the realms of the Blood March you need to first install & then load the game. To install the game, insert the CD-ROM into your CD-ROM drive on your PC. Now log onto the drive as usual. For example, if your CD-ROM is designated as Drive E:, type E: then press Enter. At the DOS prompt, type INSTALL then press Enter. Now follow the on-screen instructions. When installation is complete you will be returned to DOS. To run the game, type MIDNIGHT and then press Enter .

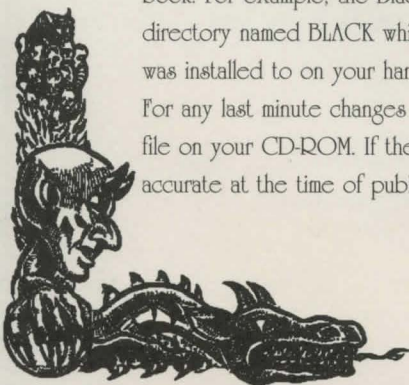

Control devices

To use a mouse you need to have a Microsoft compatible mouse driver installed. If you run the game without a mouse driver, the game will assume joystick control. Throughout the main manual, mouse control is assumed. Joystick control is identical, except you are expected to use fire button 1 for the left mouse button, and fire button two for the right.

Save game files

Whenever the game is saved, either automatically every Midnight or by you, the save game files are placed in a directory named after the color of the current book. For example, the Black book of the Blood March will be saved into a directory named BLACK which is contained within the directory that the Citadel was installed to on your hard disk.

For any last minute changes please check for the presence of a README .ascii text file on your CD-ROM. If there is no file, then all the requirements stated here are accurate at the time of publication.
