**Astro Chase 3D™... The technology within**

**Astro Chase 3D is revolutionary. You must**

**see it to believe it!” – MacHome Journal**

An alien spaceship zips by with lightning speed. You follow it on your radar screen, swiftly slip out of his line of fire, turn, take aim and fire. Toast. Then another zooms past, followed by another, and another. A whole fleet of them is dancing around you now. Time for a Single Thrust Propulsion™ maneuver. Your ship spins, firing in every direction. One by one the

universe of sight and sound as

to defend planet Earth.**

enemy explodes before you as your Ultraship's weapons systems find their mark.

Earth is safe once again. Time to "power up" your Ultra-ship before the next attack.

This is Astro Chase 3D, where revolutionary

speed, spectacular 3D graphics and real-time animation send you on a space voyage never experienced before on a Mac.

Best of all, it's full-screen excitement.

In Astro Chase 3D, it's your job to defend Earth from the alien armada's deadly matter/antimatter-powered Mega Mines which just vaporized an entire solar system.

Not to worry, you've got solar plasma beams, decoy mines and "smart" energy seeking missiles in your arsenal. What's

more, every time you "power up" you add shields, energy and more weaponry to your Ultraship's capabilities.

You get five practice levels to develop your battle finesse,

and 35 levels of tense combat action. It's a heart-pounding experience with thunder-

ing sound effects. And Astro Chase 3D self-adjusts to give you maximum speed and ani-

mation every second. But you'll never play the same game twice because every time

you take off, there's always a different universe for you to navigate and conquer.

Astro Chase 3D runs on any Macintosh with a color monitor, and fills your whole monitor,

anywhere from 12" to 21".

So take control and save planet Earth.
