

Beep, Beep, Beep!

Are you tired of the beeps coming from your IBM or compatible speaker? Then get set for the spectacular stereo sounds that can be yours with a new stereo sound board from Omnitrend.

Now you can bring your games to life with a sound board you can purchase directly from Omnitrend.

Omnitrend's new line of entertainment products use these sound boards to create dazzling stereo sound effects that put you right into the game. Games supporting these boards are filled with sound effects so realistic you won't believe your ears!

AdLib™

The AdLib Music Synthesizer Card

The AdLib card is an eleven voice music synthesizer that uses FM technology, the same technology used in many professional MIDI keyboards. This half-size card fits into any slot on your IBM or compatible computer. It includes an on-board stereo amplifier and jack to connect headphones, external speakers, or your home stereo system.

Included free with the AdLib card is the Juke Box playback program with a rousing assortment of original songs as well as a few old favorites.

System*

The Creative Music Systems GameBlaster Card

The CMS card is a twelve voice digital music synthesizer. It includes an on-board stereo amplifier, headphone jack, and jack to connect to a home stereo system.

Software is available separately, including the intelligent organ, a sophisticated program that lets you play an entire piece with just one finger!
