NOTES ON THE ATARI ST VERSION:

Hardware requirements: Any Atari ST version with at least 512K memory and a double sided 3-1/2" disk drive. The Atari ST version does not support a second disk drive.

To enter text: click in the text window or hit [RETURN] or just start typing.

The "Options Menu" is selected by moving the mouse pointer to the top of the screen.

Hints: For most players, the game will not be all that difficult. Most of the clues are rather obvious. Sandie has a lot of information. However, almost no one can go all the way through the game without getting killed a few times. If you really need help, hint sheets are available from Free Spirit. To obtain the hint sheets send a check or money order for \$5.00 to Free Spirit Software, P.O. Box 128 - 58 Noble St., Kutztown, PA 19530. Visa/Mastercard are also accepted. Please state that you want "Hint Sheets for Sex Vixens from Space - ST Version".

Ocops: An important sentence is missing from the warranty notice. If a diskette is defective, you may return it to Free Spirit, within 90 days from date of purchase, and Free Spirit will replace it free of charge.

Have Fun!

9	Getting Started: Hardware requirements for this game	
10	are as follows: Amiga 500/1000/2000 with at least 512K	
11	memory. Only one Floppy Drive is required.	
12	To start the game, boot your computer in the normal	
13	manner. When prompted for the Workbench disk, insert	
14	the disk marked 'DISK1' in the internal disk drive.	
15	If you have a second drive, insert the disk marked 'DISK2'	
16	into it. After a few seconds, you will be prompted to enter	
17	a phrase from this manual. Enter the phrase, punctuation NOT	
18	included, then press the return key.	
19	Game controls: You are Brad Stallion, you see through his eyes	
20	and you manipulate objects with his hands (the pointer).	
21	The lower one fourth of the screen display is your 'console',	
22	you have a text display area and game controls. The text	
23	display area will display a 'What Now' prompt when there is	
24	no text to display. You clear, or 'activate' the console by	
25	clicking (pressing down) the left mouse button. The pointer

50	Computer. ('Sandie' stands for "Ships Automated Navigation
51	Data and Information Entity"). Sandie is your best friend and
52	companion, totally dedicated to your well being. She will
53	help you, offer advice on occasion and sometimes act as your
54	conscience. But be careful! Sandie has been in space a LONG
55	time. Thanks to the wonders of futuristic electronics, Sandie
56	is always with you through a tele-link, even when you are off
57	the ship.
58	The 'What Now' prompt: This is your keyboard entry method.
59	All game commands have a keyboard equivalent. Typing 'n' or
60	'N' or 'North' is the same as clicking on the upward arrow of
61	the compass rose. You get the 'What Now' prompt by pressing
63	the left mouse button with the pointer over the text display
64	
	area, or by pressing the <esc>ape, <ret>urn or <spacebar></spacebar></ret></esc>
65	keys. The 'What Now' prompt must be displayed before any
66	keyboard commands can be given. To execute a command, type
67	in the command, such as 'stat' or 'status' for a
68	Status report, then press return. If an illegal command is
69	given, the text area will display 'Can't'.
70	NOTE: Every scene has its own group of legal commands. What
71	may be illegal in one scene may be a required command in
72	another.
73	The Game Options Menu: Directly above the Text Display area
74	is the Game Options Menu. Pressing the right mouse button
75	will show this menu. Continue to hold the right button down
76	then move the pointer over the desired selection and release
77	the button. Two options are available at all times, unless
78	the pointer indicates 'WAIT' or 'TEXT'.
79	Remember Brad, it is a dangerous world you inhabit, but your
80	animal cunning and sexual prowess can see you through as it
81	always has before!
