SONAR SALVAGE

A more complicated strategy game. You are in charge of a salvage/recovery company on a small island in the Caribbean Sea. Each day you hire frogmen, deep sea divers and equipment to explore the sea bed. With the use of your instruments (depth/fuel and sonar) you search for sunken treasures. The finance for these expensive operations is found by selling the relics and treasures you have recovered to local museums, auction rooms and private collectors. Your search is not easy – the sea bed is a no-man's land!!!

FEATURES: Multi-levels. Smooth moving high res multi-colour graphics.

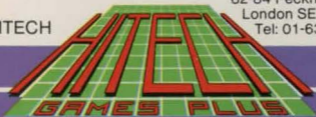

100% machine code for superfast action.

LOADING: Rewind cassette. Type LOAD "" (LOAD in capitals and no spaces between quote marks). Press ENTER key.

WARNING: Always ensure your cassette recorder is at least three feet from any T.V.
