## Instructions for Play

### Gameplay

Kelok - a master warrior of the eastern region - has been killed in battle by Xorphas, an evil warlock.

Not content with killing Kelok, Xorphas has stolen his heart, leaving Kelok's soul to wander for ever, doomed to the torment of death with no peace. Kelok's only saviour can be his "Sword of Destiny".

His search takes him to the Warlock's Abyss of Death, where Kelok's soul - with the aid of his sword - must find the eerie cavern in which his heart is entombed.

Kelok's quest begins in the Abyss of Death - knowing that his heart is hidden in its eerie depths. Help him to find peace by guiding him through the deadly caves, killing death's guardians with your magic sword as you go. Each guardian killed replenishes your power.

Use your energy wisely as every ounce will be needed. To enable you to reach your heart you must collect the flashing objects you will find on your way. Each object opens up another part of the Abyss for you to explore. If on your travels you find no way out, look for the hot air flues - you can jump higher if you stand on top of them and get onto a higher ledge.
