TIME TRAVELLER

Many centuries ago the magical hourglass of Father Time was broken by the evil Graf Von Schwarzherzen in his attempt to seize control over the Time Domain. The delicate balance of time was disturbed and must now be restored!

You wake up from a deep sleep and find yourself in the year 1990, alone on a spaceship deep in Space. You have no recollection of who you are or why you are there. Gradually you must discover your identity and destiny, then carry out the task for which fate has chosen you. Your mission will take you both to the past and to the future. You will have to utilise all the latest technology and call upon all your reserves of stamina, patience and ingenuity!

Loading the program - Time Traveller loads as normal, just type SHIFTeD RUN/STOP and the game will load and run itself automatically. Time Traveller is a big program, so you'll have to wait over ten minutes for it to load! The title page will be displayed. Just hit a key to get started, there will be a delay of a couple of seconds and then your teleprinter will start giving you the opening message. From then on, you're on your own!

Input your commands via the keyboard. There are a few one-letter commands, such as...

N	-	North	S	-	South
E	-	East	W	-	West
U	-	Up	D	-	Down
L	-	Look	I	-	Inventory

And one word commands such as...

Quit - New - Examine - Help - Look

When you are not moving around the locations, most of the other commands you need will be two word commands. These always take the form VERB OBJECT, such as LIGHT TORCH, or GET MANUAL. The program has a very wide vocabulary, but if it doesn't understand a word it will tell you and you'll have to think of another way of expressing the command. For your convenience, you can abbreviate any long words to the first four letters.

You can stop the game at any time by giving the command QUIT, or you can start a new game by giving the command NEW.
