

# Ahhh there you are!

I am the Ur-Mage Klavis Verge. Lend me your attention for a moment, for what I am about to teach you could save you many days of journeying and quite possibly your life! Using the tools of my art, I have looked into the future and seen many of the trials that you will face. This journey will be far from easy friend, do you feel up to the task?

**Proof?** You want proof of my knowledge? I'm outraged! How dare you question Klavis! ...Hmmm once again I am forgetting that this realm is not your own and you have little faith in the things that I know as fact.

Lean closer friend and peer into this portal of knowledge....

- ❖ Prince Nicolai, King Roland's son disappears; you will have to find him before the King has your head on a plate.
- ❖ Only you and your band will be able to help the Oracle regain its memory, but where does one start on such a task?
- ❖ Something will prevent you from entering the Superior Temple of Baa, but what could it be?
- ❖ The Foremost Paladin will give you a quest to find a missing damsel, but Enroth is a large land, and there is not time to search everywhere....

I have solved these and many of the other puzzles that you will face and archived the information so that you can access it from your world. Simply use the portal device you call a "telephone" and dial

**1-900-CALL 3DO (1-900-225-5336)**

As a person of your intellect should already know, something as valuable as this is not without its price. Use of these archives will cost you \$.99 a minute, and if you are not of age (18 years or older) you must ask for your parent's permission before dialing.
