INTRODUCTION

TRIP

Witts' End, Assoc. is an organization founded with you, the user in mind. We provide quality support for adventure games of all types, and from all different companies. We do this at a low cost to you. Because we charge so little for our products, currently no Witts' End packages are printed.

In the future, if these booklets prove to be a success, we may add the professional touch. That means adding color and a non-copyable format. That also means that we may begin charging some outlandishly high price. However, until then all that we can do is ask you to return our good faith in you and not distribute copies to all of your friends.

Remember, each booklet that we sell represents months of work by a large group of people. Not that we didn't enjoy every minute of it!

Thanks,  
Ed

HOW TO USE THIS BOOKLET

As we advertised, this hint book is laid out in such a way that you get the clues you need and no unwanted answers. Therefore, many answers are encoded, as well as several hidden questions.

We have tried to make the unencoded questions as general as possible, but only you can ensure that the book is used properly. That means no translating answers randomly and no looking at the back of the book until you have completed the game.

We advise that you read the General Hints section before going on to any of the specific clues. The general hints section provides information pertaining to background, parser, author's style and overall purpose.

Please decode only one hint at a time. We feel that you can get the most out of your adventure by discovering things for yourself. The hints should be used only when you are completely baffled by the situation.

Do not pay too much attention to the questions either. We have thrown in a couple of false questions to throw you off guard. Also, we have provided a complete list of objects which you can use, but you may see items there you have not yet found.

THE CODE

To help ensure secrecy for the portions of the game as yet unexplored by the player, Witts' End provides a code quite simple, yet cryptic enough to avoid gaining the answers at a glance. Basically, each letter of the alphabet in each word is moved one letter to the right.

Ex.

KNNJ TMC DQ SGD QTF  
LOOK UNDER THE RUG

For your convenience a short program is provided below (for Apple only) to decode the hints on your computer.

```

10 HOME
20 VTAB 8: PRINT "ENTER CLUE BELOW:"
30 HRZ = 1
40 VTAB 10: HTAB HRZ: GET CHAR$
50 IF CHAR$ = CHR$(3) THEN 180
60 PRINT CHAR$
70 A = ASC(CHAR$)
80 IF A = 90 THEN A = 64
90 IF A = 13 THEN 10
100 IF A <> 32 THEN A = A + 1
110 CHAR$ = CHR$(A)
120 IF HRZ = 39 THEN PRINT CHR$(7)
130 VTAB 12: HTAB HRZ
140 PRINT CHAR$
150 IF HRZ = 40 THEN 30
160 HRZ = HRZ + 1
170 GOTO 40
180 HOME:END

```

Note: Only letters are encoded, numbers and symbols remain the same.

ABOUT THE MAP

Transylvania's map is divided into two sections. They are the Forest and the Castle. All of the locations are shown.

As mentioned in the general hints section the locations in Transylvania twist and turn villainously. Therefore, the map has angling direction lines. Sometimes entering an area from the south meant that you would leave it from the east etc. Without a map, this gave the game an illusion of being larger than it actually is.

As for the key, it is printed on the second page of the map, the Castle. It explains everything except for certain rooms like the entrance to the house and the interior. These are shown to be connected when they are actually not. You must enter the house by typing "Go House".

Also there are three locations on the map which are not labeled because they are secret. They are just numbered one, two and three. They are:

1. Sghr hr sgd rdbqds zmmdw.
2. Sghr hr sgd fqzsd.
3. Sghr hr sgd zqdz adknv fqzsl.

GENERAL HINTS

THE MAP

Transylvania, from Antonio Antiochia, represents a quality effort in graphics brilliance only superseded at this time, by Sherwood Forest. Also, Transylvania is a good adventure with many tough and challenging puzzles. There are many cute little additions to the game which make it fun.

The parser in Transylvania is the standard two word format. It's vocabulary is average but not that extensive. Don't be afraid to try anything for it has a fast save routine. Often, the game will surprise you in knowing words that are relatively obscure. Most of the puzzles in Transylvania involve items so it's best to keep everything you find.

The dangerous characters should be avoided until the means is found to deal with them. Cliches do apply in Transylvania. In other words, often what is obvious will work. Most importantly, remember that there is a time limit looming over you, so don't waste any time.

Mapping Transylvania would be difficult if a map were not already provided. There are not that many locations but they do twist around. Hopefully, the map supplied is clear enough. If you should

have questions, turn to about the Map.

The plot of Transylvania is tricky. Many users commented that they would guess what would be used where and when and they would invariably be wrong. This is the primary problem.

Transylvania is not explicit about why things don't work or do work which adds to the difficulty. Users have complained about the parser particularly. Often people on the right track were thrown off the scent by using the wrong word combination. So, if you think something is right, keep trying. Be suspicious.
