- Commodore 128

### *With:*

- 512K memory
- Joystick, mouse or keyboard

- 512K memory
- Joystick, mouse or keyboard

- 64K required
  - Joystick required
- 

### *Getting Started:*

Here's all you need to start playing Black Lamp right away. Please refer to the manual for more details.

#### **On an Amiga 500 or 2000**

- Turn on your computer. Insert your Black Lamp disk when you see the Workbench prompt. The game will now load.

#### **On an Amiga 1000**

- Turn on your computer. Insert your Kickstart 1.2 or higher when you are prompted. When you see the Workbench prompt, remove your Kickstart disk and insert your Black Lamp disk.

#### **On an Atari ST**

- Turn on your Atari with the Black Lamp disk already in your drive. Wait and the Black Lamp title screen will come up in about one minute.

#### **On a Commodore 64 or 128**

- Type **LOAD "\*",8,1**. Wait about 30 seconds and the Black Lamp title screen will come up. Wait about another 30 seconds and the game will load.
