

# REALMS

*There can only be one .....  
Just make sure it's yours.*

A GRAFTGOLD Production for VIRGIN GAMES

LOVE THY NEIGHBOUR?

~ Or Put Him to the Sword? ~

THE CHOICE IS YOURS

*As a stranger in an even stranger land it's not easy to make friends and influence people. That is unless you happen to find yourself elevated to the status of a deity by the ignorant populace.*

*Now you can manipulate your followers and their money to create a healthy, wealthy and wise population ~ in turn increasing your military might. And you need it, for as your sphere of influence grows, so too does resentment from the rulers of neighbouring realms.*

*Do you barter with them? Or battle with them? There are endless strategic possibilities, but only one goal: Global Domination.*

*With REALMS, Graftgold brings arcade playability to the complex world of strategy simulations and has created a living playfield. A realistic, fractal~ based board where the 'pieces' go about their own business ~ until you see fit to give them a helping hand. There's no need to wade through rivers of icons. Everything about REALMS is intuitive. Even the way you play.*
