Y Z A B C D E F G H I J K L M N O P Q R S T U V W X

Choose the hint corresponding to the place
where you are stuck, as indicated by the
questions in English. To decode a hint,
find each letter in the top row of the key,
and substitute the letter in the bottom
row.

ASYLUM is an adventure like no other. In addition to Med Systems' famous three-dimensional graphics, ASYLUM accepts simple sentences as well as one and two word commands. You can actually tell the computer to **"PUT THE BOX UNDER THE BED."** The object of the game is simple. Escape from an asylum filled with bizarre objects, strange characters, alert guards, and the most disorienting floor plan ever designed. You'll be lucky to remain sane, much less escape. But don't say we didn't warn you!
