Dear *SierraOriginals* Customer,

You hold in your hands a part of computer gaming history. All these titles have the original storyline and technological innovations that have helped define and create the PC-Gaming industry as it appears today. Consider these titles as pictures in a scrapbook - a snapshot of history that has helped to evolve the computer gaming industry. All of the *SierraOriginals* titles have been kept in their original form. No attempt to modernize or improve the game was made with these titles in order to maintain the sense of nostalgia.

Some of the CD's may contain a PATCH directory. To determine if your program has a PATCH program, go to your CD-ROM prompt in DOS (i.e., your D:\> assuming your CD-ROM drive is labeled D) and type:

DIR <ENTER>

If the directory listing has a [PATCH] option, then you will need to add these patch files into the game directory after installing the game to your computer. For example, if you installed King's Quest V, and you noticed a directory called [PATCH], you would use the following command to copy the patches into the KQ5 directory:

COPY D:\PATCH*.*C:\SIERRA\KQ5<<ENTER>>

NOTE - the above example assumes that your CD-ROM is

labeled as your D drive, and you installed the game to your C hard drive into the directory \SIERRA\KQ5. Please substitute the correct path information in the example above.

Windows '95 users may also have to play the game under DOS, since many of the titles are true DOS games and were created before Windows '95 was released. When using Windows '95, you can re-start your computer in a true DOS mode by clicking on the START button, selecting the SHUT DOWN option, and selecting the "Restart the computer in MS-DOS mode?" item.

Finally, many of these products were released before many of the high quality sound cards such as the AWE 32, Gravis Ultrasound and Ensoniq SoundScape have been released. When selecting an audio/music option for the game, your best bet is to select the AD-LIB option.

On behalf of Sierra On-Line, thank you for purchasing this *SierraOriginals* product. We appreciate the opportunity to share our history with you and your entire family!

Respectfully,

Gary Brown

INSTALLATION

1. Put the game CD in your CD-ROM drive.
2. From DOS, change to your CD drive (e.g., D:<enter>), and type INSTALL<enter>.
From Windows, pull down the FILE menu and select RUN.
Type D:\SETUP and click OK.
3. Follow the on-screen instructions. When offered the chance to view the README file, do so. If you later change hardware or settings, you can run the program again without losing your saved games.

RUNNING THE GAME

The game won't run without the game CD in your CD-ROM drive. (Duh!)

From DOS, change to the C:\SIERRA directory (or the directory where you installed the game) and type: `fpfpcd<enter>`

From Windows, open the sierra group and double-click on the game's icon.

THE MODERN DAY BOOK OF HEALTH AND HYGIENE

AMINOPHYLLIC CITRATE

An extremely powerful cure for temporary (non-acute) flatulence, in man or beast. Should Aminophyllic Citrate be unavailable, it may be created in the home laboratory: Combine 40 grams Sodium Bicarbonate with 15 ml. Furachlordone. Pour into beaker. Dilute with water to make 100 ml. Add 5 grams Magnesium Sulfate, stir the mixture well using only a pure glass rod. Pour into medicine bottle and cork. Mix 1:1000 with water.

BIMETHYLQUINOLINE

A crystalline substance used in the manufacture of certain drugs. Hard-to-find but well worth the trip to the Joliet Bimethylquinoline Mines to pick up some freshly-hewn granules.

BISALICYLATE ANTITOXIDENE

Has been found to be an effective, albeit highly powerful, compound in the correction of diarrhea, although it is not normally recommended for individuals due to its extreme concentration and possibility for overdose, with subsequent dire consequences. Best when taken with vast quantities of water. Storage may be a problem due to short shelf life. May be

synthesized as follows: Combine 25 ml. of Bismuth Subsalicylate with 5 ml. of Orphenamethihydrate in a test tube. Heat over flame until mixture begins to boil. Pour into medicine bottle and cork. Remove from flame and dilute with one thousand gallons of water (approximately). Makes enough Bisalicylate Antitoxidene for four thousand doses.

BISMUTH ENTEROSALICYLINE

Used in the compounding of drugs such as Beinbyate, Lezl-E Neelcin, Sudabum, and Quinotrazate.

BISMUTH SUBSALICYLATE

Primarily prescribed as a stool darkener. Some believe it to be efficacious in a variety of digestive aids.

FURACHLORDONE

Used in the manufacture of Aminophyllic Citrate, Limnotic Knidphyte, Chloroslychmun, and other popular medications. Also useful as a topical remedy for poison ivy, poison oak, poison sumac, poison honeysuckle, and poison lily-of-the-valley.

MAGNESIUM SULFATE

Commonly known as "Epsom Salts." Not useful per se as a medication or component, but definitely helpful when your Epsoms taste a little too bland.

METYRAPHOSPHATE

An anti-conceptuant when used in conjunction with Bimethylquinoline according to laboratory specs.

ORPHENAMETHIHYDRIDE

A desalinization compound. Also a handy substitute for vermouth.

PEPTICLYMACINE TETRAZOLE

Effective aid in treatment of the vapors. Available from Furnette Formulas, Cincinnati, Ohio. Pepticlymacine Tetrazole is an acceptable substitute for Tyloxpolynide. Dispense at 40 ml. per bottle.

PHENODOL OXYTRIGLYCHLORATE

A compound composed of sugary esters and mentholated chlorine. Used in the manufacture of Quatrotritalite,

Benzaphyl, and Quinotrazate. Available from **Kookamunga Khemicals, Boston, Massachusetts.**

QUINOTRAZATE

A highly efficacious and useful medication when taken orally at a dosage of NTE 60 mg/day. To prepare: to 15 ml. of Bismuth Enterosalicyline, add 30 gm of Phenodol Oxytriglychlorite to produce Quinotrazate. Mix together in a glass beaker. Stir the mixture well using only a pure clean glass rod. Process into pill form. Usual dosage is 21 pills.

SODIUM BICARBONATE

Baking soda. Used to correct flatulence & diarrhea; useful on fires (by producing carbon dioxide in large quantities, thus suffocating the flames). Also amusing when added to acetic acid (vinegar). Available from Watt & Crickson Chemists, San Francisco, California.

TYLOXPOLYNIDE

An effective aid in the treatment of the vapors. Not possible to synthesize in the home laboratory, however, substitutions are permissible. (See: **PEPTICLYMACINE TETRAZOLE.**) Available

from D. B. Aze & Sons, Baltimore, Maryland.

DIARRHEA

Diarrhea is caused by too many soft, liquidy foods finding their way into your digestive system. Unchecked, it can lead to dehydration. It may be cured quickly and cleanly by eating quantities of solid foods, or foods with stiffening ingredients like pectin, such as: fibrous breads, apples, cruciferous vegetables like broccoli and cauliflower, etc. (see **BISALICYLATE ANTITOXIDENE.**)

FLATULENCE

Properly treating flatulence, whether in man or beast, requires diagnosing the source of the offensive odor. Obtain a sample of the gaseous matter (any simple container, such as a paper bag, will suffice). Place your gas spectroscope (you do still have that old gas spectroscope out in the barn, don't you?) in front of a lit alcohol amp or Bunsen burner. Burn the gas on the flame and observe the spectra readout. Compare the readout to the tintypes below and treat with the appropriate solution:
