INTRODUCTION

Welcome to the world of Roger Wilco.

We hope you have as much fun playing this game as we did creating it. *Space Quest 5: The Next Mutation* is an interactive adventure game which allows you to follow multiple paths to win the game.

The whole point of playing an adventure game like *Space Quest 5: The Next Mutation* is to discover puzzles and find the solution to them in a limited amount of time. However, some puzzles may be extremely well hidden, or so obscure that you don't have any idea where to begin. Or, this may be your first experience with an adventure game. If so, don't feel badly if you get stuck occasionally, you'll get the hang of it in no time.

How to use a hint book.

If you get stuck, look through this book for a question that sounds like your problem. The hints for each question are organized from "slightly helpful," to "here's a big clue," to "smack! here's the answer!," so you should read them individually and in order. Place your viewer card with the red plastic window over each answer to reveal it.

How NOT to use a hint book.

Use this book only for the hints you really need. It defeats the purpose of an adventure game to read this manual from cover to cover and learn all the answers. Just to keep you honest, we've thrown in a few "Red Herrings" to trip up those of you who choose not to heed this advice.

If you've finished *Space Quest 5: The Next Mutation*.

Even after you've "won" the game once, we're sure we can interest you in playing again. There are lots of little tidbits tucked away in *Space Quest 5* that you probably won't encounter your first time through the game. You may

want to go back and try some puzzles again to achieve a maximum score or just experiment "to see what happens."

If you've enjoyed this game, be sure to check out some of the other installments of the *Space Quest* series from Sierra. Good luck in your adventuring and we hope you enjoy *Space Quest 5!*

HOW TO PLAY AN ADVENTURE GAME

To master this game, you'll need good adventure game strategy. Here are a few tips that will help.

- 1. Use the Look  and Hand  icons on just about everything,** especially on a new screen or when new items appear on a screen you've previously seen. A little discretion is required here as some game characters may not appreciate being given this kind of once-over. You may want to think twice before putting your paws on that drooling, seven-foot-tall terror beast that just walked in, for instance. Always pay close attention to what your crew and the other characters in the game say to you.
- 2. If it's not nailed down, take it.** There's no limit to how much Roger can carry in *Space Quest 5*, so the more items you have, the merrier. If you can pick it up, you'll probably need it.
- 3. Try to use all of your Inventory items on the various puzzles in the game.** Even if an item doesn't work, it might be good for a few yucks.
- 4. Save early, and save often.** This advice is not only good for retirement planning, it's good for adventure gaming too. You never know when a nasty

surprise could deep-six Roger. It may also be helpful to save a game right before a particularly challenging puzzle to allow you the opportunity to test several approaches.

5. Read and save the *Galactic Inquirer*. The *Galactic Inquirer* is a vital part of what we like to call, the “*Space Quest 5* Experience.” If you throw it away you will not only be missing out on some of the galaxy’s juiciest gossip, but you will also seriously impair your chances of finishing the game.

6. If you get stuck, try visiting places you’ve already been. Clues are given in many places, going back may give you a chance to find something that you overlooked previously.

7. Talk to your crew. They often have a better idea of what’s going on than you do. Even if they don’t, they may have a helpful suggestion about where you should go.

THE MAKING OF SPACE QUEST V

The Making Of Space Quest 5: The Next Mutation.

The development process for *Space Quest 5*, began in December 1991 when Director Mark Crowe and Assistant Director David Selle sat down and began

Mark Crowe and Dave Selle

roughing out the story line for *The Next Mutation*. It took them about a month of conceptual work to come up with the preliminary design and story for *Space Quest 5*.

The next phase of development was to firm up the story line, flesh out the design and draw

the storyboards for the project. Technical issues and feasibility of designer ideas were evaluated and revised with input from both the programming and art teams. For *Space Quest 5*, this

process stretched out over a two month period, during which time Art Director Shawn Sharp penciled over 200 sketches for the storyboards.

With the storyboards under development, backgrounds for the game were being roughed out. Nearly one hundred backgrounds and close-ups were called for in *The Next*

Shawn Sharp

Mutation. Background painter Rhonda Conley was the in-house specialist responsible for painting the many backgrounds sketched out by hard-working Shawn Sharp.

Space Quest 5 Art Team From left to right: Mike Jahnke, Rhonda Conley, Sean Murphy, Ron Clayborn, Kerrie Abbot and Jarrett Jester.

After the storyboards were drawn up and the backgrounds specified, the animation sequences were planned and a preliminary art schedule worked out. An extensive list was drawn up for *SQ5* detailing the

more than 1100 loops of animation that would be called for in the finished game. Lead Production Artist Mike Jahnke headed up the team of artists that undertook this formidable task.

After the static backgrounds were painted, they were digitized and scanned into the computer. The animation sequences were brought into the game in two ways: some loops were hand-painted, while others were digitized in a video capture process using live actors and a 3-chip video camera. Production artists Jarrett Jester, Kerrie Abbott, Ron Clayborn and Sean Murphy took these raw images and shaped them into the animation loops and backgrounds that were incorporated into the final game.

Space Quest 5 programming team taking care of the project manager. From left to right: Geoff Rosser, Nancy Hamilton, Mark Crowe, Joe Nelson, David Sandgathe and Hugh Diedrichs.

went to work combining the disparate elements of the game into a cohesive whole. Programmers Geoff Rosser, Hugh Diedrichs, Joe Nelson and Nancy

Hamilton faced the daunting task of bringing together art, music, and story elements within the framework of the overall game design. *Space Quest 5* was programmed using a proprietary scripting language called SCI (short for Sierra Creative Interpreter).

Composers Chris Stevens and Tim Clarke

Early in the production process for the game, a sound and music specification was drawn up by the design team and given to composers Chris Stevens and Tim Clarke. Together, they sweated over every grunt, gasp and groan that went into the final game soundtrack. Meanwhile, Assistant Director David

About four months into project, the final production schedule was arrived at and the programming team fired up, led by David Sandgathe. As the artists finished artwork, the programming team

Selle shouldered the burden of writing the myriad of text and dialogue needed for *The Next Mutation*.

After programming was completed, the game faced a four-month quality assurance process led by Forrest Walker and Greg Giles to ensure that no bugs or glitches remained in the shipped version of the game.

Finally, 14 months after the preliminary design meetings were held, *SQ5* was shipped to eager *Space Quest* fans across the galaxy. But the story doesn't end there, *The Next Mutation* will be translated into five languages and converted to a full-voice CD-ROM version as well. Whew!

Development Sketches

WD40

CLIFFY

CHARACTER DESCRIPTIONS

Florence Qwerty - "Flo"

Rating: Communications Specialist, Grade 4.

Age: 40 something

Personality profile: Flo is a highly skilled and effective communications officer—in the rare moments when the mood strikes her. She spends most of her time on the bridge reading glamour magazines and doing her nails. Flo has her own set of priorities and will not undertake any task she deems pointless or beneath her talents. Needless to say, this has led to a certain amount of friction with her superior officers in the past. Flo has a bit of difficulty maintaining long-term relationships with men, but it's not for lack of trying; her trail of ex-husbands stretches across the Galaxy.

Clifford Crawford - "Cliffy"

Rating: Chief of the Boat, SCS *Eureka*. Chief engineering officer.

Age: 51

Personality profile: More at home with machines than people, Cliffy spends most of his time puttering about the nooks and crannies of the engineering section. He's the kind of guy who can fix a warp motivator with bailing wire and chewing gum, and still make it exceed rated output by 20%. Cliffy is extremely loyal to those few people he considers friends, but those who don't know him often find Cliffy bad-tempered and querulous.

Droole

Rating: Nav/weapons technician, second class.

Age: 102

Personality profile: Droole is a surly and sarcastic navigation/weapons officer with an itchy trigger finger. Given the chance, Droole will shoot first and ask questions later. His current posting to the *Eureka* is the result of an unfortunate incident involving an unarmed freighter and a defective com-link.

WD40

Rating: Science officer third class (field commission).

Age: n/a

Personality profile: WD40 was a DeathStalker Mark VI Annihilator android from the planet Oakhurst IV before Cliffy reprogrammed her to serve as a member of the *Eureka's* crew. WD40 is both cool and efficient, maintaining a cybernetic aloofness no matter how tense the situation may be.

Raems Tipper Quirk

Rating: Captain, SCS Goliath

Age: 38

Personality profile: Captain Quirk is an ambitious, petty and opportunistic sycophant, slithering his way towards the upper echelons of the StarCon hierarchy. His dislike of Roger is immense. Captain Quirk's latest scheme

for personal aggrandizement is a clandestine effort with the Genetix corporation to dump toxic wastes illegally on planets in the G6 quadrant. He also has designs on Ambassador Beatrice Wankmeister.

Beatrice Creakworm Wankmeister

Rating: G6 Quadrant 's Ambassador to the Star Confederacy

Age: 29

Personality profile: Striking looks, a keen intellect, and a strong personality have combined to make Beatrice Wankmeister one of the most effective negotiators in the history of the G6 Quadrant's diplomatic corps. An outspoken advocate on sentient species' rights and environmental issues, Beatrice's vigorous activities in these areas have led to several legislative measures and two stellar protocols, including one on hazardous waste disposal. Beatrice's natural inclination to speak her mind has been tempered, but not eliminated, by her years of service in the diplomatic corps. She has gone after the interstellar consortiums with a dogged tenacity that, at times, bordered on the obsessive. Beatrice is currently single, having little time or interest for anything but her work.

I can't figure out what I'm supposed to do at StarCon Academy.

I'm in class taking the SAT but I don't know any of the answers.

I got busted by the Proctormatic 9000.

All the other cadets are really mean to me!

I was told to clean the academy crest but I don't know how.

O.K., I got the cleaning supplies, now what?

SPACE QUEST 4

There are several areas that are "off-limits" to me. I need to get back there to hide from the sentry robots!

I've finished cleaning the crest and interrupted the conference meeting, now what?

A Garbage Scow By Any Other Name... (still smells as bad)

I'm Captain of the SCS *Eureka*, but I don't know what to do.

I've been ordered to undertake a Refuse Recovery Mission, but I can't find the coordinates I need to get there.

I'm having trouble recovering refuse.

SPACE QUEST V

I want to beam down to some of the planets, but I can't.

The *Eureka* keeps losing hull integrity and I don't know what to do.

I rescued this cute little, um, "thing," but it keeps making holes in the deck.

Apollo, the sun god, grabbed my ship with a giant hand and he won't let it go!

I got ambushed by an android!

How to Avoid the Droid

I keep getting nailed on Kiz Urazgubi!

How can I fight something I can't even see?

I've "bould'er" over with my ingenuity, now what?

CLIFFY: I'm sorry, but you're out of luck. I can't see you, and I can't hear you. You're invisible and deaf. You're a ghost!

Egad! Cliffy won't let me beam back up to the *Eureka!*

SPACE QUEST V

Help! I've fallen and I can't get up!

I found WD40's ship, but I can't get inside.

I can't figure out how to open the nondescript panel.

Monkey Business at the Space Bar

I can't win *Star Cruiser*.

Cliffy got busted, what should I do?

Cliffy's in the brig and I can't get past the guards!

I found Cliffy, but I can't extract him from his predicament.

Much Ado at Klorox II

I've been ordered to Klorox II for an auxiliary garbage pickup, but there isn't any trash to recover.

Ugh! I can't escape the "Loggies of Death."

I found a computer terminal, but I don't know the access code.

I got the colonist's body into the Med-Lab. Should I use the Autodoc to conduct an autopsy?

QUEST QUEST 1

Thrakus: Fun with Fungi

I died as soon as I beamed down the to planet's surface.

I've looked everywhere and there's nothing down here!

I see a steaming "pod" but I can't get to it.

I got "puked-out" after I looked in the Pod.

I got munched by the Mold Monster!

The ambassador knocked me over a cliff! (I've heard of falling for a girl, but this is ridiculous!)

I'm precariously hanging over the edge of a 10,000 foot cliff with a woman pulling my pants down while a horde of slimy mutants is shooting noxious spitballs at me! What should I do!

The woman of my dreams got slimed!

Man overboard!

The *Goliath* blew me away after I beamed back from Thrakus!

Cliffy is "lost in space."

I'm having a hard time grappling with the EVA pod.

To Bea, or not to Bea; that is the question.

I don't know whether I should try to find a way to cure Beatrice or if I should concentrate on going after the pukoids.

I want to track down the source of these mutants but I don't know where to look.

Genetix: A Roger-Fly in the Ointment

I went to Genetix but they warned me to leave!

I had a transporter malfunction and it really "bugs" me!

I tried to talk to Cliffy, but he squished me!

I've talked to Flo but I can't figure out how I'm supposed to get back to normal.

I'm feeling like myself again, but I can't figure out how to get inside the lab.

O.K., I busted into the lab, but now I'm stuck.

SPACE QUEST V

Beatrice croaks when I try to cure her!

The Final Conflict (more or less)

I'm ready to go after the *Goliath*, but she blows me away every time I try to get near her.

I figured out how I can sneak up on the *Goliath*, but I'm at a loss as to what I should do next.

I managed to get to the *Goliath* but there was a Pukoid welcoming committee waiting for me.

I made it to the *Goliath's* engine room, what now?

No matter which way I try to go in the hallway, I die.

I'm completely baffled and utterly confused by the layout of the subfloor crawlspaces.

I made it through the maze and shut down the generator, but I still died.

I'm in the transport room but I can't restore the *Goliath's* crew.

Quirk escaped! Then he metamorphosed and trashed the *Goliath*.

Eureka! I'm Back...

The Blob crushed the *Goliath*, and it took me out too!

I stopped the Blob from squashing the *Goliath*, but then it munched down on the Eureka.

SPACE QUEST V

I confined the Blob, but the ship is coming apart at the seams.

I'm ready to go, but the transporter blew up!

Object	Where Found	Where Used
ANTACID TABLETS	Cliffy's Tool Box (<i>Eureka</i>) engineering section	<i>Eureka</i> science lab specimen tank (while Spike is inside tank)
CLOAKING DEVICE	Klorox II, in WD40's ship	on the <i>Eureka</i> (installed by Cliffy)
BUCKAZOIDS	Inventory	never
BUSINESS CARD	Space Bar	Genetix-Science lab door lock (with hole punch)
COMMUNICATOR	<i>Eureka</i>	various
FROCK	escape pod on Thrakus	Thrakus – handed to Bea while hanging on cliff
FUSE	Cliffy's tool box	fuse panel (inside service tube in <i>Eureka</i> engineering section)
HEAD	Kiz Urazgubi "big log" scene	on the <i>Eureka</i> – given to Cliffy
BROKEN BRANCH	Kiz Urazgubi "big log" scene	falls to bottom pool in "log" scene – used to reach fruit and to pry up the boulder which smashes WD40

Object	Where Found	Where Used
BANANA-LIKE FRUIT	Kiz Urazgubi "big log" scene	use the branch to reach it – Roger stuffs it in exhaust pipe while hiding inside the hollow log on Kiz Urazgubi
SPACE MONKEYS	Space Bar	Space Bar, in Roger's drink
LIQUID NITROGEN	Genetix science lab	Given to Cliffy (used later by WD40 on <i>Goliath's</i> bridge)
CANISTERS		
OXYGEN MASK	in storage locker inside <i>Eureka</i> pod bay	just before beaming down to Thrakus
OXYGEN TANK	<i>Eureka</i> pod bay storage locker	EVA pod
PAPER	floor of Klorox II greenhouse	contains password for computer log-in.
HOLE PUNCH	Cliffy's tool box	at Genetix, to punch holes in the business card
SAFETY CONES	closet at StarCon	academy crest
FLOOR SCRUBBER	closet at StarCon	academy crest
SHIP OPENER	"Souvenir" from WD40 given by Cliffy in <i>Eureka</i> science lab	on Kiz Urazgubi – to open WD40's ship

Object	Where Found	Where Used
SPIKE (BABY FACE- HUGGER)	Eureka's trash compartment	Space Bar detention area, to dissolve bars on Cliffy's cell
LASER TORCH	Cliffy's toolbox	EVA pod (to cut opening in <i>Goliath's</i> hull)
WARP DISTRIBUTOR CAP	Eureka science lab (given by Beatrice)	<i>Goliath</i> engine room

Points list for *Space Quest 5*

StarCon

Going to Class	5
Cheating off big-head cadet (first time)	5
Passing the SAT test (awarded at "Captain" transformation)	100
Taking the safety cones from the closet	10
Getting the floor scrubber from the closet	10
Completion of scrubbing detail on Academy Crest	50

StarCon Region Total **180**

Eureka

Garbage pickups (100 for each)	200
Rescuing Spike from the trash	20
Putting Spike in the specimen tank (1st time)	20
Getting antacids from Cliffy's toolbox	15
Giving antacids to Spike in the specimen tank	20
Taking the hole punch from Cliffy's toolbox	5
Taking the torch from Cliffy's toolbox	5
Taking the fuse from Cliffy's toolbox	5
Successful beam in from KU (1st time)	175
Beaming back from the Space Bar after rescuing Cliffy	200
Arriving at Klorox II (orbiting)	10
Hailing ship (Quirk) at Klorox II	10

Orbiting Genetix (after it's been blown up)	10
Orbiting Thrakus (when Bea is there)	20
Getting the air mask from the locker	5
Putting on air mask (before beaming to Thrakus)	20
Activating the cryo-chamber at the correct time	20
Putting Bea in the chamber	20
Successfully freezing Bea in the cryo-chamber	75
Defrosting Bea (when you know how to cure her)	50
Putting Bea in the transporter (to cure her)	50
Choosing Evasive action in the asteroids	35
Getting the oxygen tank	25
Grappling Cliffy with the EVA pod arm	100
Successfully returning to the <i>Eureka</i> with Cliffy	50
Cloaking the <i>Eureka</i> at the correct time	50
Taking the EVA pod to the <i>Goliath</i>	300
Successfully attaching the EVA pod to the <i>Goliath</i>	50
Using the laser torch on the <i>Goliath's</i> hull	100
Firing on the Quirkoid blob while it's attacking the <i>Goliath</i>	50
Sucking the Blob up with the RRS	200
Giving Flo the order to abandon ship (at the right time)	10
Activating the self-destruct (at the right time)	100

Fixing the transporter (by replacing fuse in service tunnel sub-panel)	175
Getting Spike before you leave	10
Getting Bea before you leave	10

Eureka Region Total	2220
----------------------------	-------------

Kiz Urazgubi

Beaming in before <i>Eureka</i> is blown up	10
Picking up the branch	10
Taking the banana-like fruit	25
Hitting WD40 with the boulder	100
Shoving banana in WD40's jet-pack tailpipe	200
Picking up her decapitated head	25
Getting WD40's ship open	100
Taking cloaking device from WD40's ship	200
